Preface	xi
Chapter 1 Transient Combustion Phenomena in Various Media	1
Application of the Detailed Reaction Mechanism of Fuel Oxidation for Modeling Multistage Autoignition in Diesel Engine <i>S. S. Sergeev, S. M. Frolov, V. Ya. Basevich, F. S. Frolov, B. Basara, and P. Priesching</i>	3
Combustion Regime Transition for an <i>n</i> -Decane/O ₂ /Ar Mixture at Various Thermodynamic Initial Conditions <i>H. Quintens, C. Strozzi, R. Zitoun, and M. Bellenoue</i>	28
Kinetics of Aluminum Particles Combustion in a Solid Propellant Combustion Products Media <i>V. A. Babuk, N. L. Budnyi, and A. A. Nizyaev</i>	43
On the Dependence of Reaction Rate on Strain Rate of Reacting Medium <i>V. S. Trofimov, V. A. Veretennikov, and E. V. Petrov</i>	54
Transient Combustion Phenomena in High-Speed Flows in Ducts <i>V. V. Vlasenko, V. A. Sabelnikov, S. S. Molev, O. V. Voloshchenko, M. A. Ivankin, and S. M. Frolov</i>	62
Chapter 2 Gaseous, Heterogeneous, and Condensed-Phase Detonations	89
Characteristics of Cellular Detonation in Convergent Channel <i>Q. Liu, Y. Liu, and J. H. S. Lee</i>	91

Spectral Structure of Thrust and Gas Pressure Pulsations Signals in Nozzles with Deflector <i>V. A. Levin, N. E. Afonina, V. G. Gromov, I. S. Manuylovich, G. D. Smekhov, A. N. Khmelevsky, and V. V. Markov</i>	101
The Practice of Detonation Waves Simulation on Fully Unstructured Computational Grids <i>A. I. Lopato and P. S. Utkin</i>	116
Interaction of Detonation Waves in Composite Silane–Hydrogen Mixtures with Clouds of Inert Micro- and Nanoparticles <i>D. A. Tropin and A. V. Fedorov</i>	127
Modeling of Initiation of Gas Detonation in Plane Radial Chamber with Outflow Towards the Periphery <i>D. V. Voronin</i>	135
Modeling of Detonation Propagation in Heterogeneous Aluminum Mixtures in Channels of Variable Cross Section <i>A. V. Fedorov and S. A. Lavruk</i>	144
Detonation Propagation in Bidisperse Aluminum Micro- and Nanoparticles Gas Suspension <i>A. V. Fedorov, T. A. Khmel', and S. A. Lavruk</i>	154
Numerical Investigation of the Effect of Water Spray on Irregular and Regular Gaseous Detonation <i>H. Watanabe, A. Matsuo, K. Matsuoka, A. Kawasaki, and J. Kasahara</i>	165
To the Mechanisms of Particle Relaxation Behind a Shock Wave <i>D. A. Sidorenko and P. S. Utkin</i>	184
Modeling of Cellular Detonations in Aluminum Submicron and Nanoparticle Suspensions <i>T. A. Khmel' and A. V. Fedorov</i>	192
Research on Stability of Primary Explosive at Extreme Temperature <i>Shiyi Liu, Zinian Jia, and Jin Chen</i>	204
Detonation Waves in Emulsion Explosives: Modes of Propagation <i>S. A. Gorinov and I. Yu. Maslov</i>	215

Numerical Simulation of Shock and Detonation Waves in Bubbly Liquids	225
<i>R. R. Tikhvatullina and S. M. Frolov</i>	

Chapter 3 Applications of Fast Combustion Modes and Detonations in Industry 241

Recent Studies on Liquid-Fueled Rotating Detonation Engine	243
<i>A. K. Hayashi, W. Yoshida, M. Asaharai,</i> <i>N. Tsuboi, and E. Dzieminska</i>	
Research and Development of Rotating Detonation Engine System for the Sounding Rocket Flight Experiment	251
<i>J. Kasahara, A. Kawasaki, K. Matsuoka,</i> <i>A. Matsuo, I. Funaki, D. Nakata, and M. Uchiumi</i>	
Blast Wave and Fireball After Hydrogen Tank Rupture in a Fire	260
<i>V. V. Molkov, D. M. C. Cirrone, V. V. Shentsov,</i> <i>W. Dery, W. Kim, and D. V. Makarov</i>	
Steadily-Rotating, Semiconfined, Overdriven Detonation: An Experimental Study	275
<i>C. Jourdain, V. Rodriguez, R. Zitoun,</i> <i>and P. Vidal</i>	
Advancements in Laboratory-Scale Detonation Experiments at Air Force Research Laboratory	289
<i>M. L. Fotia, J. Hoke, and F. Schauer</i>	
Study of the Thrust of a Reactive-Type Pulsed Detonation Combustor Operating on Oxygen-Enriched Jet A-1 / Air Mixtures	304
<i>K. Alhussan, M. S. Assad, O. G. Penyazkov,</i> <i>and I. I. Chernukho</i>	
Continuous Detonation of a Hydrogen–Oxygen Gas Mixture in a Plane-Radial Combustor with Exhaustion Toward the Periphery	309
<i>F. A. Bykovskii, S. A. Zhdan, E. F. Vedernikov,</i> <i>A. E. Tarnaikin, and A. N. Samsonov</i>	

Air-Breathing Pulse Detonation Engine Thrust Module: Numerical Simulations, Test Fires, and Flight Experiments <i>S. M. Frolov, V. S. Aksenov, V. S. Ivanov, I. O. Shamshin, and A. E. Zangiev</i>	325
On the Utilization of the Kinetic Energy of Pulsed Detonation Products <i>S. M. Frolov, V. S. Smetanyuk, P. A. Gusev, A. S. Koval, and S. A. Nabatnikov</i>	344
Analysis of Advanced Turbine Integration with Rotating Detonation Combustors Using a Time-Accurate Reduced-Order Model <i>J. Braun and G. Paniagua</i>	362
Pulsed Detonation Hydramjet <i>S. M. Frolov, K. A. Avdeev, V. S. Aksenov, F. S. Frolov, I. A. Sadykov, I. O. Shamshin, and R. R. Tukhvatullina</i>	372
Rocket Engine with Continuously Rotating Liquid-Film Detonation <i>S. M. Frolov, I. O. Shamshin, V. S. Aksenov, I. A. Sadykov, P. A. Gusev, V. A. Zelenskii, E. V. Evstratov, and M. I. Alymov</i>	397
