

Contents

| | |
|---|-----|
| Physical and Chemical Kinetics, Phase Transformations and Nonequilibrium Processes, Heterogeneous Catalysis | 19 |
| Development of the Technology of Superhard Materials <i>N. V. Novikov and V. Z. Turkevich</i> | 21 |
| O. I. Leipunsky — the Diamond Problem and Its Development <i>V. I. Pepekin</i> | 25 |
| Thermodynamic Method of Determination of Nanoparticles Characteristics <i>V. A. Babuk, A. D. Zelikov, and R. M. Salimullin</i> | 33 |
| Research of Kinetics of $\beta \rightarrow \delta$ Polymorphic Transformation in HMX by the Method of Isothermal Calorimetry <i>V. V. Zakharov and B. L. Korsunskii</i> | 42 |
| Catalytic Role of Mobile Defects in Solid-Phase Chain Processes <i>A. M. Kaplan and N. I. Chekunaev</i> | 49 |
| Research of the Dissolved Gases Influence on Oxidation Kinetics of the Dispersed Titanium <i>N. Kh. Kopyt, T. P. Sadlij, L. G. Milova, N. N. Kopyt, V. V. Kalinchak, and A. V. Drosdenko</i> | 62 |
| Features of Applying Adiabatic Calorimetry for Study of Chemical Reaction Kinetics <i>A. A. Kossoy and I. Ya. Sheinman</i> | 72 |
| Influence of Reagents Association on Kinetics of Synthesis and Decomposition Reactions of Explosives <i>T. P. Kulagina and L. P. Smirnov</i> | 78 |
| Formation of Ionized Condensed Disperse Phase Around a High-Temperature Metal Particle <i>L. A. Lyalin, K. I. Semenov, and N. Kh. Kopyt</i> | 89 |
| Detonation Process As a Branching Chain Reaction. Calculation of Velocity and Pressure of Detonation in the Condensed Phase at 100% TMD <i>A. V. Pozdnyakov</i> | 99 |
| Specific Features of Josephson Weak Links with Anharmonic Current-Phase Dependence <i>D. M. Sergeev and K. Sh. Shunkeev</i> | 111 |

| | |
|--|-----|
| Lengthy Mineral Ceramics Products with Nanostructure Obtained by SHS-Extrusion <i>P. M. Bazhin and A. M. Stolin</i> | 121 |
| Jahn–Teller and Renner–Teller Effects in Kinetics and Reaction Mechanism of Unsaturated Hydrocarbons and Their Fluoroderivatives <i>I. V. Bilera, Yu. A. Borisov, N. N. Buravtsev, and Yu. A. Kolbanovsky</i> | 125 |
| Description of Carbon Behind Fronts of Shock and Detonation Waves <i>I. M. Voskoboinikov</i> | 132 |
| High-Pressure Influence on Rate of Monomolecular Chemical Reaction <i>Yu. M. Burov</i> | 137 |
| Mechanism of Associated Reactions and Limit of Gaseous Mixture Autoignition <i>V. M. Gendugov, N. F. Nazarov, and E. V. Ryabokobylenko</i> | 143 |
| Gases Critical Conditions and Induction Time of Burning on Surface of Catalyst Particles <i>V. V. Kalinchak, A. N. Sofronkov, A. S. Chernenko, A. A. Moysa, and A. A. Golovko</i> | 147 |
| Mechanochemical Regulation of the Technological Combustion Process — Creation of Composition Systems with Different Structural Levels <i>N. N. Mofa, T. A. Shabanova, V. I. Antonuk, and Z. A. Mansurov</i> | 153 |
| Excitation of Acoustic Oscillations in Case of Vapor Condensation on Drops of Liquid in a Vapor–Gas Mixture <i>V. R. Pesochin</i> | 159 |
| Electrical Oscillations in the Combustion Zone of Dusty Flame <i>N. I. Poletaev</i> | 164 |
| About Positron Bound States on Vacancies and Pores in Metals <i>E. P. Prokopiev, V. I. Grafutin, and S. P. Timoshenkov</i> | 169 |
| Vibrational Nonequilibrium in Hydrogen–Oxygen Reaction <i>O. V. Skrebkov</i> | 174 |
| Thermochemical Kinetics of Heterogenous Processes in Powder Systems of Different Physicochemical Nature <i>V. P. Solntsev, V. V. Skorokhod, and T. A. Solntseva</i> | 180 |
| Kinetic Modeling of Benzene Oxidation <i>N. S. Titova, S. A. Torokhov, and A. M. Starik</i> | 185 |

| | |
|--|------------|
| Initiation and Waves Propagation in Reactive Systems | 191 |
| Transverse Waves at Detonation | |
| <i>S. S. Rybanin and Yu. M. Mikhailov</i> | 193 |
| Transient Combustion of Gaseous and Liquid Fuels in Underventilated Enclosures | |
| <i>G. M. Makhviladze and S. E. Yakush</i> | 198 |
| Gasdynamic Effects of Blast in Premises | |
| <i>A. G. Girin and N. Kh. Kopyt</i> | 204 |
| Combustion of Ethanol Azide Thickened by Polymers | |
| <i>V. V. Golovko, A. K. Kopeyka, and A. V. Florko</i> | 214 |
| Nanodispersed Silica Effect on Aluminothermal SHS Combustion of Chromium Oxide (III) | |
| <i>E. E. Dilmukhambetov and S. M. Fomenko</i> | 221 |
| Quasi-Stationary Propagation of Combustion Wave in Gas Mixtures | |
| <i>R. Sh. Enalejev</i> | 228 |
| On Conditions for Self-Pulsating Open Flame Combustion Mode of Propane–Butane Mixture | |
| <i>M. Yu. Trofimenko, S. K. Aslanov, and V. V. Kalinchak</i> | 236 |
| Combustion Theory for Propagation and Structure of Polymerization Front in Porous Filler | |
| <i>G. V. Shkadinskaya, P. E. Matkovsky, and K. G. Shkadinsky</i> | 242 |
| Point Blast in a Dusty Air | |
| <i>A. G. Girin</i> | 247 |
| Mechanism of Reaction Front Propagation in $\text{Fe}_2\text{O}_3 + 2\text{Al} + 30\% \text{Al}_2\text{O}_3$ Mixture | |
| <i>B. S. Seplyarskii, G. B. Brauer, and A. G. Tarasov</i> | 252 |
| Filtration and Heterogeneous Combustion | 255 |
| Saffman–Taylor Problem in Filtration Combustion | |
| <i>A. P. Aldushin and B. S. Braverman</i> | 257 |
| Carbon Porous Particle Gasification in Carbon Dioxide | |
| <i>V. M. Gremyachkin and E. P. Mazanchenko</i> | 263 |
| Stability of Stationary Front of Filtrational Combustion of Porous Mixtures of Quasi-Two-Dimensional Geometry | |
| <i>P. M. Krishenik, N. I. Ozerkovskaya, A. N. Firsov, and K. G. Shkadinsky</i> | 268 |

| | |
|---|------------|
| Stefan Flow Effect on Ignition and Combustion Characteristics of Refractory Metal Particle <i>S. G. Orlovskaya, F. F. Karimova, and M. S. Shkoropado</i> | 274 |
| Determination of Particle Combustion Time in Axis Symmetrical Laminar Dusty Flames <i>N. I. Poletaev</i> | 281 |
| Influence of the Flame's Macroparameters on Dispersed Characteristics of the Combustion Products <i>N. I. Poletaev and Yu. A. Doroshenko</i> | 286 |
| Neutralization of Chlorine by Calcium-Based Sorbents at Gasification of Solid Fuel <i>M. V. Tsvetkov and E. V. Polianczyk</i> | 292 |
| On Perspective to Apply the Filtration Combustion Process to Metal-Containing Products Extraction from Nontraditional Raw Materials <i>I. Yu. Gudkova, D. B. Lempert, and G. B. Manelis</i> | 296 |
| Limits of Stationary Propagation of the Filtration Combustion Wave in Fuel-Lean Mixture: A Model and Experiment <i>I. I. Amelin, E. A. Salgansky, N. N. Volkova, E. V. Polianczyk, and G. B. Manelis</i> | 300 |
| Main Approaches to the Mathematical Modeling of Physicochemical Processes at Filtrational Combustion of Metal-Containing Systems <i>G. E. Zaslavsky and G. B. Manelis</i> | 304 |
| Separation of Solid Fuels Conversion Zones During Filtration Combustion <i>E. A. Salgansky, V. M. Kislov, S. V. Glazov, E. V. Polianczyk, M. V. Salganskaya, and G. B. Manelis</i> | 310 |
| Space Stability for Nonadiabatic Waves of the Gases Filtration Combustion <i>M. M. Kabilov</i> | 314 |
| Study of Heat and Mass Exchange of Coal Particle in High-Temperature Oxidizing Medium <i>S. G. Orlovskaya, L. I. Ryabchuk, V. V. Kalinchak, and S. K. Protas</i> | 320 |
| Energetic Materials and Interior Ballistics | 323 |
| Investigation of Nonstationary Solid Propellant Combustion and the O. I. Leypunsky's Laboratory <i>A. G. Istratov and V. N. Marshakov</i> | 325 |
| Enhancement of Performance Characteristics of Energetic Nanocomposites <i>I. G. Assovskiy and A. A. Berlin</i> | 335 |

| | |
|---|-----|
| Combustion of Furazans and Furoxans <i>V. P. Sinditskii, W. D. He, M. K. Vu, V. V. Serushkin, V. Yu. Egorshv, A. B. Sheremetev, N. N. Machova, N. S. Aleksandrova, and A. S. Kulikov</i> | 339 |
| Aluminum Particle Combustion <i>V. M. Gremyachkin and A. G. Istratov</i> | 344 |
| Thermodynamic Aspects of Possibility of Creation of Propellants with Carbon Dioxide as Oxidizer <i>E. M. Dorofenko, D. B. Lempert, and G. B. Manelis</i> | 349 |
| On Storability of Standard Explosives According to the Results of Selective Quality and Safety Control of Factory Production Lots with Long Terms of Storage <i>S. I. Kashaev, I. Z. Akhmetov, R. Kh. Gabdullin, V. P. Ilyin, V. V. Sudakov, and F. T. Khvorov</i> | 355 |
| On Possibility to Create Solid Composite Propellants with Density 2.2 kg/l and Higher <i>D. Lempert, G. Nechiporenko, and G. Manelis</i> | 361 |
| Erosion Effect in Solid Rocket Motors <i>V. N. Marshakov and B. V. Novozhilov</i> | 369 |
| Aluminum Agglomeration in Combustion of Composite Solid Propellants: From Microstructure to Combustion <i>S. A. Rashkovskiy</i> | 377 |
| Nanosized Materials and High-Energy Condensed Systems <i>Yu. V. Frolov and I. V. Fomenkov</i> | 383 |
| Influence of Catalytic Additives on the Burning Performances of Metallized Solid Propellants <i>V. A. Arkhipov, I. S. Bespalov, T. I. Gorbenko, and L. A. Savel'eva</i> ... | 388 |
| Possibility of Oxidation of Aluminum in Detonation Wave <i>I. M. Voskoboïnikov</i> | 394 |
| Comparing Nano- Versus Microiron Oxide Catalysts for Composite Solid Rocket Propellants <i>P. Donegà, A. Bandera, A. Reina, G. Colombo, F. Maggi, L. T. DeLuca, and B. M. Kosowski</i> | 398 |
| Aluminum Particle Combustion Characteristics at Wide Variations of Particle Sizes <i>A. A. Zenin, G. P. Kusnezov, and V. J. Kolesnikov</i> | 402 |

| | |
