LECTURES LIST

Plenary Lectures

Gabibov Aleksander	16
Novel approaches for screening biodiversity	
Vladimirov Yury	17
Enzymes, radicals, deseases and agening	
Bonch-Osmolovskaya Elizaveta	18
New thermophilic prokaryotes, new metabolic pathways	
Wohlgemuth Roland	19
Extremophilic Enzymes for resource-efficient, robust and selective biocatalytic synthesis of small molecules	
Varfolomeev Sergey	20
Neuroenzymology: kinetics of biocatalytical reactions in human brain	
Masson Patrick	21
Competing substrate kinetics for michaelian enzymes and for enzymes showing activation/inhibition by excess substrate: application to kinetic analysis of cholinesterases	
Tishkov Vladimir	22
New biocatalysts for processes of fine organic and chiral synthesis with oxidoreductases	
Švedas Vytas	23
Knowledge-based modulation of enzyme functional properties	
Egorov Aleksey	24
Beta-lactamases - drivers of bacterial antibiotic resistance	
Savitsky Alexander	25
Development of new enzyme mechanisms of animal antiviral resistance using African swine fever virus model	
Nemukhin Aleksander	26
Diversity of mechanisms in enzyme-catalyzed phosphorus-oxygen bond cleavage reactions	
Ugarova Nataliya	27
The emitter as an intramolecular probe in the luciferase active center	
Bronich Tatyana	28
Nanotechnology platforms in cancer therapy (Engineering Targeted Polymeric Nanocarriers for Drug Delivery)	
Deev Sergey	29
Smart nanomaterials for biomedical application	
Kurochkin Ilya	30
Highly sensitive bioanalytical systems based on plasmonic and polymer nanocomposites	
Klyachko Nataliya	31
Overcoming Biological Barriers in Proteins Drug Delivery	

Fundamental Biocatalysis

General Aspects

Miroshnikov Konstantin	32
Bacteriophage tail spike proteins: Enzymatic interaction with bacterial polysaccharide directs viral specificity	
Smirnov Ivan	33
Amicoumacin A kinases: structure, kinetics and function	
Eldarov Mikhail, Tishkov Vladimir	34
Genetic, biochemical and physiological characterization of novel D-amino acid oxidases from <i>Ogataea parapolymorpha</i> DL-1	
Muronetz Vladimir	35
Effect of post-translational modifications on the amyloid transformation of proteins	
Rozova Olga	36
Malic enzymes in the metabolism of obligate methanotrophs	
Martirosyan Levon	37
Changes in peroxidase activity in horseradish (<i>Armoracia rusticana</i>) roots with red light additional irradiation under conditions of aeroponic phytotron	
Likhtenstein Gerz	38
Orbital Factors Affected on Electron Transfer and Light Energy Conversion in Photoenzymes and Model Systems: A Connection between Spin Exchange and Electron Transfer	
Dokudovskaya Svetlana	39
Regulation of mTORC1 pathway	
Bacheva Anna	40
Non-protein effectors of the proteasome	
Gromova Elizaveta	41
Functional role of DNMT3a DNA methyltransferase mutations observed in acute myeloid leukemia	
Rao Desirazu	42
Deciphering the functional requirement of Zinc finger motif(s) in <i>Helicobacter pylori</i> Topoisomerase I catalysis	
Kubareva Elena	43
Bacterial DNA-mismatch repair endonucleases MutL: structure and interaction with molecular partners	

Structural Aspects of Biocatalysis

Phillips Robert	44
Structure and mechanism of D-ornithine/D-lysine decarboxylase, a stereoinverting Fold-III decarboxylase	
Rakitina Tatyana	45
Application of X-ray crystallography, comparative modeling and molecular dynamics to investigation of structural determinants of enzymatic activation and substrate specificity.	
Boyko Konstantin	46
3D structure of the natural tetrameric form of human butyrylcholinesterase as revealed by cryoEM, MD and SAXS	
Demidkina Tatyana	47
Sulfoxides of sulfur-containing amino acids - suicidal substrates of methionine gamma-lyase as antimicrobial and antimycotic prodrugs.	
Bezsudnova Ekaterina	48
Effects of amino acid substitutions in the characteristic sequence motifs on the profile of substrate specificity of PLP fold type IV transaminases	
Tishchenko Svetlana	49
Investigation of T2 channel of two-domain laccases	

Computer Modeling and Bioinformatics

Hayashi Hideyuki	50
Quantum-chemical analysis of the catalytic reaction of aspartate aminotransferase	
Sokalski Waclaw	51
Origins of enzyme catalytic activity explored within theory of intermolecular interactions and biocatalyst design using catalytic fields	
Khrenova Maria	52
Towards deep insight into the cephalosporin hydrolysis in the active site of metallo-beta-lactamase	
Zlobin Aleksander	53
Towards application of deep convolutional neural networks to enzyme design	
Zalevsky Artur	54
Unraveling Na ⁺ dependent thrombin activation with large-scale QM/MM simulations	
Mikoulinskaia Galina	55
L,D-peptidases of coliphages: structure, properties, regulation and biotechnological potential	

Applied Biocatalysis

Littlechild-Bond Jennifer	56
Thermophilic Enzymes for Industrial Biocatalysis	
Gusakov Aleksander	57
Lytic polysaccharide monooxygenases: structure, mechanism and function	
Batyrova Khorcheska	58
Novel enzymes for biosynthesis and biotransformation of adipic acid	
You Delin	59
Baeyer-Villiger Monooxygenases XanO4 Catalyzes Cyclic Ether Formation	
Atroshenko Denis	60
Multipoint mutants of TvDAAO with improved catalytic properties and stability	

Medicine

Trudil David	61
Use of Bacteriophage and lytic enzymes for the detection, treatment and prevention of bacterial infections	
Maksimenco Aleksander	62
New challenges of contemporary healthcare. Enzyme derivatives of combined action and conjunctive courses of biocatalysts	
Klochkov Sergey	63
Natural scaffolds as modulators of farnesyltransferase activity	
Yakovlev Aleksey	64
¹ H NMR <i>in vivo</i> study of inhibitory neurotransmitter impact to human brain in videostimulation	
Filatova Lubov	65
Interaction of lysozyme with mucoadhesive polymers	
Belogurov Aleksey	66
Charge-mediated proteasome targeting as a novel type of ubiquitin-independent degrons	
Herrmann Martin	67
Aggregated neutrophil extracellular traps are multifaceted biocatalysts.	
Gazaryan Irina	68
Activation of antioxidant genetic program: a mechanistic insight	
Makhaeva Galina	69
From acetylcholinesterase inhibitors to multitarget ligands: a step forward in Alzheimer's disease drug discovery	
Abramov Andrey	70
The role reactive oxygen species production in physiology and in mechanisms of neurodegeneration	
Demina Olga	71
Design and development of antiplatelet agents.	

Analytical Application of Biocatalysis

Zvereva Mariya	72
Oligonucleotide functionalized nanoparticles for SERRS detection of short tumor-derived DNA fragments	
Zavarykina Tatyana	73
Association of molecular genetic markers of cell cycle control and DNA repair genes with progression free survival of ovarian cancer patients after platinum-based chemotherapy	
Eremin Sergey	74
Enzyme-Linked Immunosorbent Assay (ELISA) with photometric and chemiluminescent detection	
Guliev Rustam	75
The use of vibrational spectroscopy for healthcare oriented biosensors	
Vasilieva Aleksandra	76
Applying the HPLC-MS / MS method to identify and quantify oxidative post-translational modifications of proteins	
Lomakina Galina	77
Bioluminescent indication of stress effects on living cells	
Shumyantseva Viktoriya,	78
Cytochrome P450 electrocatalytic systems for drug metabolism modeling, drug discovery and drug-drug interaction studies	
Plekhanova Yuliya	79
Polyelectrolyte microcapsules with enzymes for use in analytical systems	
Suntsova Anastasiya	80
New approach to identification of microorganisms with Fourier-transformed infra-red spectroscopy	
Yurina Lubov	81
Development of a diagnostic approach based on the detection and quantification of sites of post-translational modifications using the HPLC-MS / MS method in the protein components of blood plasma	
Tyubaeva Polina	82
Biopolymer nanofibrous materials for tissue engineering and medicine	

Nanomaterials and Nanotechnologies

Golovin Yurii	83
Possible modes of influence, state and prospects for the application of variable magnetic fields as a means of controlling biochemical systems	
Pashirova Tatyana	84
Nanotechnology strategies using oxime-loaded lipid nanoparticles for brain protection and treatment of organophosphorus poisoning	
Kazakov Sergey	85
Lipobeads: Mechanisms for Controlled Release of Encapsulated Anticancer Drugs	
Kost Olga	86
Inclusion of drugs into nano- and microparticles for use in ophthalmology	
Le-Deygen Irina	87
Functionalized lipid drug delivery containers	
Shibaeva Anna	88
Polyacrylate of gold is a candidate chemotherapeutic agent for curing melanoma	
Nechitailo Galina	89
Biotechnological experiments at orbital space stations and perspective use of nanotechnology for commercial application	
Korzhikova-Vlakh Evgeniya	90
Polypeptide nanoparticles as drug delivery systems	
Korzhikov-Vlakh Viktor	91
Glycosaminoglycans based nanogels for ocular drug delivery	
Vlasova Kseniya	92
Magnetic liposome responsive to super-low frequency alternating magnetic field	
Nechaeva Nataliya	93
Surface-Enhanced Raman Spectroscopy in Glycated Albumin Detection	
Skuredina Anna	94
The development of a fluoroquinolone delivery system with improved pharmacokinetic characteristics using β -cyclodextrin derivatives	

Young Scientists Session

Matyushenko Aleksander	95
Actin cytoskeleton functioning in neurons	

Co-Symposium "Extremophiles"

Alekhova Tatyana	96
Microbiom International of Space Station	
Gavrilov Sergey	97
Novel determinants of extracellular electron transfer underlying exoelectrogenesis and biogenic crystallization of magnetite in a thermophilic bacterium <i>Carboxydothemus ferrireducens</i>	
Naranjo Leopoldo	98
Insight into Extremophilic Hydrocarbonoclastic Fungi for Sustainable Development of Oil Industry	
Petrovskaya Lada	99
Lipolytic enzymes from permafrost microorganisms	
Ravin Nikolai	100
Cloning, expression, and characterization of novel chitinases from extremophilic bacteria	

POSTERS LIST

1. Fundamental Biocatalysis

Abisheva Aleksandra	102
Minichaperone-based fusion system for stabilization of hydrophobic proteins in stably soluble forms	
Abrosimova Ludmila	103
Studying the interaction of nicking endonuclease BspD6I and its variants with DNA	
Baldin Semen	104
Modeling of substrate binding with L,D-transpeptidase 2 from <i>Mycobacterium tuberculosis</i> by advanced metadynamics	
Baranova Margarita	105
Formation kinetics of MHC1-peptide-TCR tree-molecular complexes associated with HIV-1	
Drobot V.V	106
Molecular modeling of penicillin acylase mutant with increased specificity to bromoacetamide as acyl donor	
Gabdulkhakov Azat	107
In search of transport network to trinuclear copper centre of two-domain laccases	
Kirilin Evgeny	108
Catalytic processing of human type receptors by H5N1 Influenza neuraminidase using molecular modeling	
Koltover Vitaly	109
Nuclear spin catalysis in biomolecular motors: premises and promises	
Kovalevskii Rostislav	110
Effects of N-terminus structure on stability and catalytic properties of formate dehydrogenase from yeast <i>Ogataea parapolymorpha</i>	
Krukova Mariya	111
Structural and functional characterization of a new member of the HSL family from Siberian permafrost microbial community	
Kulikova Olga	112
Role of CopC from <i>Thioalkalivibrio paradoxus</i> as a copper chaperone	
Mokrushina Yuliana	113
Antibody-based biocatalysts: how to predict selectivity and improve reactivity toward organophosphorus compounds.	
Mustakhimov Ildar	114
The ectoine degradation pathway in halotolerant methanotrophs	
Mustakhimov Ildar	115
The amino acid substitutions in NADPH preferring acrylyl-CoA reductase AcuI shift the enzyme specificity toward NADH	
Nemtseva Elena	116
Structure and function of two types of bacterial luciferase	
Podshivalov David	117
Investigating dynamic characteristics of the binding pocket in the influenza hemagglutinin	
Pometun Anastasiya	118
Fusion enzymes based on monooxygenases with internal cofactor regeneration	
Savin Svyatoslav	119
Structural studies of formate dehydrogenases	
Shaposhnikov Leonid	120
Role of Cys230 in thermal and chemical stability of formate dehydrogenase from yeast <i>Ogataea parapolymorpha</i> DL-1	

Shipkov Nikolai	121
Preliminary characterization of two novel thiocyanate dehydrogenases from halophilic sulfur oxidizing Gammaproteobacteria <i>Thiohalobacter thiocyanaticus</i> HRh1T and <i>Guyparkeria</i> sp. SCN-R1.	
Varfolomeeva Larisa	122
Crystallization and structure analysis of the mutant forms of thiocyanate dehydrogenase from <i>Thioalkalivibrio paradoxus</i>	
Varizuk (Kulikova) Irina	123
Nucleoside phosphorylases for preparation of biologically active nucleosides. Search of optimal substrates.	
Zenin Vladimir	124
Apical domain of thermophilic chaperone as stabilizing fusion partner	
2. Applied Biocatalysis	
Belova Alla	125
Linoleic acid obtaining from safflower oil by lipases from different sources	
Chertova Nataliya	126
Development of the phospholipase A2 recombinant enzyme technology for the food industry	
Ilina Anna	127
Enhancement of ethanol and sensorial compounds production from cane molasses by manganese ferrite and co-culture use	
Khusnutdinova Anna	128
Novel enzymes for biosynthesis and biotransformation of adipic acid	
Morozova Irina	129
Penicillin acylase in chemoenzymatic synthesis of peptidomimetics	
Nikulin Maksim	130
Search for biocatalysts of polydepsipeptide synthesis	
Siñeriz Faustino	131
Biocatalysts. Hydrolases Production	
Sinitsyna Olga	132
Novel Recombinant Phytase Preparation obtained by <i>Penicillium</i> sp.	
Zaitseva Elena	133
Biocatalytic synthesis of the conducting copolymer of aniline and 2-aminophenethyl alcohol using a laccase-mediator system	
Zaitseva Elena	134
Biocatalytic synthesis of conducting polyaniline for development of effective coatings against corrosion and static electricity	
Zaitseva Elena	135
Biocatalytic synthesis of conducting poly(3,4-ethylenedioxythiophene) using “soft” natural template DNA	
3. Environmental Biocatalysis	
Gladchenko Marina	136
The application of physico-chemical and biological methods to suppress the processes of gas generation in grounds	
Maksimova Yuliana	137
Heterogeneous and homogeneous biocatalysts for the biodegradation of nitriles and acrylamide	
Polivtseva Valentina	138
New Soil Strains-Destructors of Phenol	

4. Medicine

Brenner Polina	139
Association of polymorphic markers of TP53 and CDKN1A genes with the progression free survival of ovarian cancer patients after platinum-based chemotherapy	
Maksimenko Aleksander	140
Inactivating and stabilizing effects of glycosaminoglycan ligands during molecular docking of hyaluronidase	
Neganova Margarita	141
Cyclic hydroxamic acids as effective inhibitors of histone deacetylases	
Zueva Irina	142
Novel acetylcholinesterase inhibitors based on 6-methyluracil moiety for Alzheimer's disease treatment	
Zueva Irina	143
A trifluoroketone, slow-binding inhibitor of human acetylcholinesterase, acting as a transition state analog of acetylcholine	

5. Analytics

Lomakina Galina	144
Bioluminescent indication of the temperature stress on prokaryotic cells	
Maloshitskaya Olga	145
A mass spectrometric study of sphingolipids, biomarkers of amyotrophic lateral sclerosis	
Solovyev Ilya	146
FCS and FLIM methods combination for caspase-3 FRET sensor	
Ugarova Nataliya	147
Cell membrane permeability and integrity monitoring using firefly luciferase bioluminescent system	

6. Nano

Abakumov Maksim	148
Magnetic nanoparticles in cancer therapy and diagnostics	
Durmanov Nikolai	149
The application of porous silver surfaces and nanoparticles in virus detection and identification via SERS	
Kolmogorov Vasiliy	150
The effects of Paclitaxel, Cytochalasin-D, Progerin on cancer cell compartments studied by elastic modulus measurement via Scanning Ion-Conductance Microscopy	
Konyakhina Appolinariya	151
Nanocomposites based on carbon nanotubes and amphiphilic diblock copolymers: preparation and prospects of application as biosensor coatings	
Korotkova Anastasiya	152
Green synthesis nanoparticles of metal oxide in water extract of parsley	
Le-Deygen Irina	153
Study of magnetic field parameters influence on exosomal membrane fluidity in complexes with magnetic nanorods by fluorescent spectroscopy	
Orlova Marina	154
Nanomaterials based on hydroxyapatite and carboxycellulose for drug delivery	
Vaneev A.	155
Superoxide dismutase nanoparticles for the treatment of inflammatory eye diseases	

Vanzarakshaeva Saruna	156
he development of magnetic liposomes-based nanoparticles iron oxide with different anisomeria	
Veselov Maxim	157
Aggregation of hybrid magnetite-gold nanoparticles modified with enzyme and inhibitor under low-frequency magnetic field
