Introduction	
<i>S. M. Frolov</i>	viii
Chapter 1 Fundamentals of Gaseous Deflagrations and Detonations	1
Detonation initiation in a combustible gas mixture at interaction of a shock with inert gas bubble <i>P. Yu. Georgievskiy, V. A. Levin, and O. G. Sutyryn</i>	3
Ranking of fuel–air mixtures in terms of their propensity to deflagration-to-detonation transition <i>S. M. Frolov, V. I. Zvegintsev, V. S. Aksenov, I. V. Biler, M. V. Kazachenko, I. O. Shamshin, P. A. Gusev, and M. S. Belotserkovskaya</i>	12
Numerical simulation of detonation wave propagation in the nonuniform medium in the shock-attached frame <i>Ya. E. Poroshyna, A. I. Lopato, and P. S. Utkin</i>	43
Reactive Euler model for detonation propagation in a nonuniform medium <i>A. R. Kasimov and A. Yu. Goldin</i>	50
The effect of an initial sinusoidal density perturbation on the nonlinear dynamics of one-dimensional unsteady gaseous detonations <i>Mira Kim, Xiaocheng Mi, Charles B. Kiyanda, Honghui Teng, and Hoi Dick Ng</i>	55
Propagation of gaseous detonations in planar curved rectangular channels <i>M. L. Fotia, J. Hoke, A. J. Olson, and S. A. Schumaker</i>	68
Influence of pressure on the unsteady wall heat flux during a self-sustained detonation: An experimental investigation <i>H. Quintens, Q. Michalski, F. Vivot, J. Sotton, and M. Bellenoue</i>	80
Numerical study of detonation propagation in viscous turbulent flow in a duct <i>V. A. Sabelnikov, V. V. Vlasenko, S. Bakhne, S. S. Molev, and A. I. Troshin</i>	99

Detonation structures in a supersonic annular ramjet chamber <i>A. V. Trotsyuk</i>	113
Chapter 2 Fundamentals of Heterogeneous Deflagrations and Detonations	129
Numerical simulation of the compaction effect during the shock wave – particle layer interaction <i>Ya. E. Poroshyna and P. S. Utkin</i>	131
Explosion and detonation processes in chemically active bubbly systems <i>P. A. Fomin</i>	141
Fast complex for monitoring droplets and vapors in clouds and aerosol flows at pulsed injection of liquid fuels into the atmosphere <i>A. V. Zagnit'ko, N. P. Zaretskiy, I. D. Matsukov, V. V. Pimenov, S. E. Sal'nikov, and D. Yu. Fedin</i>	160
Chapter 3 Pulsed and Continuous Detonations	169
Multidimensional simulations and test fires of a hydrogen-fueled ramjet with an annular detonative combustor at approaching air flow of Mach 2 and 1.5 <i>V. S. Ivanov, S. M. Frolov, V. S. Aksenov, P. A. Gusev, I. O. Shamshin, A. E. Zangiev, and V. I. Zvegintsev</i>	171
Pulse-detonation steam superheater <i>S. M. Frolov, V. A. Smetanyuk, I. O. Shamshin, and F. S. Frolov</i>	201
Burning of the mixture of liquid kerosene and air in the detonation chamber 503 mm in diameter with variations of its geometry <i>F. A. Bykovskii, S. A. Zhdan, and E. F. Vedernikov</i>	224
Pressure measurements in rotating detonation engines <i>V. S. Ivanov, S. M. Frolov, S. S. Sergeev, Yu. M. Mironov, A. E. Novikov, and I. I. Schulz</i>	241
Supersonic argon flow parameters in an arcjet thruster <i>V. I. Gorbunkov, V. V. Shalay, and N. V. Pustovoi</i>	274
