
CONTENTS

Contributors	xiii
Introduction	xix
Part One Explosions of Gaseous Mixtures	1
FORTY YEARS OF INVESTIGATION OF DIFFUSION IGNITION	
<i>P. Wolański</i>	3
1 Introduction	3
2 Experimental Research	4
3 Further Studies and Conclusions	8
References	9
DIFFUSION SELF-IGNITION OF SUDDEN DISCHARGE	
OF HYDROGEN	
<i>V. V. Golub</i>	11
1 Introduction	11
2 Experimental Investigation of Diffusion Self-Ignition	
at Pulse Release of Hydrogen into a Channel	12
3 Pulse Jet Emerging to Semiconfined Air Space	19
4 Concluding Remarks	22
Acknowledgments	23
References	23
HAZARDS OF HYDROGEN AND SYNTHETIC GAS	
<i>A. A. Vasil'ev and V. A. Vasiliev</i>	25
1 Hydrogen	25
2 Hydrogen and Synthetic Gas Production	26
3 Introduction	26
4 H ₂ -O ₂ and H ₂ -Air Mixtures	28
5 H ₂ -O ₂ -Steam and H ₂ -Air-Steam Mixtures	30
6 H ₂ -CO-O ₂ and H ₂ -CO-Air Mixtures	32
7 Concluding Remarks	35
Acknowledgments	35
References	36

STRUCTURE AND FLAME PROPAGATION REGIMES IN TURBULENT HYDROGEN JETS	
<i>A. Vesper, G. Stern, M. Schwall, N. Kotchourko,</i>	
<i>M. Rottenecker, G. Fast, M. Kuznetsov, and W. Breitung . . .</i>	
	37
1	Introduction 37
2	Experimental Details 40
3	Experimental Results 42
4	Concluding Remarks 49
	Acknowledgments 50
	References 50
EXPERIMENTAL STUDY OF HAZARDS FROM UNSTEADY HYDROGEN JETS IN AIR	
<i>J. Grune, K. Sempert, M. Kuznetsov, and W. Breitung</i>	
	51
1	Introduction 51
2	Experimental Setup 52
3	Hydrogen Release at Elevated Pressure 53
4	Experimental Results for Ignited Unsteady Free Jets 55
5	Hazard Potentials 63
6	Concluding Remarks 65
	References 66
AUTOIGNITION OF METHANE–AIR MIXTURES AT ELEVATED TEMPERATURES AND PRESSURES	
<i>O. G. Penyazkov, K. L. Sevrouk, E. A. Baronishin,</i>	
<i>V. Tangirala, and N. Joshi</i>	
	67
1	Introduction 67
2	Experiment 68
3	Results 72
4	Concluding Remarks 77
	Acknowledgments 78
	References 78
EFFECT OF OXYGEN MOLECULES ACTIVATION IN ELECTRIC DISCHARGE ON FLAME PROPAGATION IN H ₂ –AIR AND CH ₄ –AIR MIXTURES	
<i>A. M. Starik, V. E. Kozlov, and N. S. Titova</i>	
	79
1	Introduction 79
2	Governing Equations and Kinetic Model 80
3	Comparison with Experimental Data 82
4	Mechanisms of Flame Velocity Increase 94
5	Concluding Remarks 101
	Acknowledgments 102
	References 102

STRUCTURE OF NONPREMIXED TURBULENT FLAMES	
<i>M. R. H. Sheikhi, T. G. Drozda, C. K. Madnia, and P. Givi</i>	105
1 Introduction	105
2 Configurations	106
3 Formulation	107
4 Parameters	109
5 Results	110
Acknowledgments	116
References	116
STUDY ON CONSEQUENCE ANALYSES OF BLAST WAVES GENERATED BY GASEOUS DEFLAGRATIONS	
<i>R. Dobashi, S. Kawamura, K. Kuwana, and Yo. Nakayama</i>	119
1 Introduction	119
2 Previous Models	120
3 Theoretical Model of Gaseous Deflagration	123
4 New Scaling Law	126
5 Concluding Remarks	127
Acknowledgments	128
References	128
MODELING AND SIMULATIONS OF FLAME MITIGATION BY FINE WATER SPRAY	
<i>A. Yu. Snegirev and A. L. Lipjainen</i>	129
1 Introduction	129
2 Model Description	130
3 Results and Discussion	139
4 Concluding Remarks	149
Acknowledgments	151
References	151
FUNDAMENTAL PHENOMENA OBSERVED IN LARGE-SCALE DEFLAGRATIONS OF FLAT CLOUDS — ILLUSTRATED BY HIGH-SPEED VIDEOS	
<i>H. Schneider</i>	153
1 Introduction	153
2 Experimental Setup	154
3 Theory	154
4 Results	157
5 Concluding Remarks	166
References	167

BLAST WAVE CHARACTERISTICS AND EQUIVALENCY	
<i>I. Sochet and H. Schneider</i>	169
1 Introduction	169
2 Experiments	170
3 Shock Wave Characteristics	172
4 TNT Equivalency	178
5 Concluding Remarks	182
References	183
NUMERICAL AND EXPERIMENTAL STUDY OF SHOCK-TO-DETONATION TRANSITION IN A TUBE WITH A SHAPED CONVERGING-DIVERGING SECTION	
<i>I. V. Semenov, P. S. Utkin, V. V. Markov, V. S. Aksenov, and S. M. Frolov</i>	185
1 Introduction	185
2 Problem Formulation	187
3 Mathematical Model	188
4 Numerical Procedure	190
5 Computational Results and Discussion	190
6 Experimental Study	196
7 Concluding Remarks	200
Acknowledgments	201
References	201
FLOW REVERSAL IN SPINNING DETONATION	
<i>F. Viot, M. Kurosaka, B. Khasainov, D. Desbordes, and H. N. Presles</i>	203
1 Introduction	203
2 Numerical Technique	203
3 Numerical Results	206
4 Swirling Flow	207
5 Concluding Remarks	210
Acknowledgments	211
References	211
Part Two EXPLOSIONS OF HETEROGENEOUS MIXTURES	
	213
SUBCRITICAL TO SUPERCRITICAL MIXING	
<i>C. Segal and S. A. Polikhov</i>	215
1 Introduction	215
2 Experimental Results	219
3 Analysis	224
4 Concluding Remarks	227
Acknowledgments	228
References	228

REACTIVITY OF SMALL-SCALE BORON-CONTAINING NANO-SIZE PARTICLES	
<i>V. G. Slutsky, S. A. Tsyganov, E. S. Severin, and L. A. Polenov</i>	231
1 Introduction	231
2 Modeling Carborane Nano-Size Particle Ignition	232
3 Concluding Remarks	235
References	236
ASSESSMENT OF EXPLOSION RISK OF MAGNESIUM DUST	
<i>M. Nifuku, H. Ohya, and S. Koyanaka</i>	237
1 Introduction	237
2 Experimental	238
3 Experimental Results and Discussion	239
4 Concluding Remarks	245
Acknowledgments	246
References	246
STATIC ELECTRIFICATION OF POWDERS AND DUST EXPLOSIONS	
<i>M. Nifuku</i>	247
1 Introduction	247
2 Mechanism and Process of Static Electrification	248
3 Characteristics of Static Electrification	249
4 Electrostatic Discharge	261
5 Ignition Characteristics of Dust Explosion	262
6 Prevention of Dust Explosion Caused by Static Electrification	265
7 Concluding Remarks	268
References	269
HETEROGENEOUS DETONATION OF MONODISPERSE AND POLYDISPERSE GAS-PARTICLE MIXTURES: RECENT ACCOMPLISHMENTS	
<i>A. V. Fedorov, T. A. Khmel, and Yu. V. Kratova</i>	273
1 Introduction	273
2 Physical and Mathematical Model of Heterogeneous Detonation	273
3 One-Dimensional Theory of Heterogeneous Detonation	280
4 Two-Dimensional Theory of Unsteady Detonation	283
5 Concluding Remarks	287
References	288

INFLUENCE OF PARTICLE SIZE AND ETHYLENE ADMIXTURE ON POLYETHYLENE DUST EXPLOSIONS	
<i>P. Amyotte, N. Marchand, A. Di Benedetto, and P. Russo</i>	291
1 Introduction	291
2 Experimental	293
3 Results and Discussion	296
4 Concluding Remarks	301
References	302
DETONABILITY OF ALUMINUM SUSPENSIONS	
<i>A. Briand, B. Veyssiere, and B. A. Khasainov</i>	303
1 Introduction	303
2 Numerical Modeling of Two-Phase Detonations	305
3 Influence of Particle Diameter on Detonation Structure	309
4 Influence of Characteristic Chemical Lengths on Detonation Structure	312
5 Concluding Remarks	314
References	315
REACTION MECHANISM OF ALUMINUM PARTICLES–AIR DETONATION	
<i>F. Zhang, K. B. Gerrard, and R. Ripley</i>	317
1 Introduction	317
2 Pressure Dependence of Aluminum–Air Detonation	319
3 Unconfined Aluminum–Air Detonation	323
4 Aluminum Reaction Model	325
5 Numerical Results and Discussion	327
6 Concluding Remarks	333
References	334
DETONABILITY OF LIQUID-FUEL DROP SUSPENSIONS IN AIR	
<i>S. M. Frolov and V. S. Posvyanskii</i>	337
1 Introduction	337
2 Phenomenology	339
3 Mathematical Formulation	347
4 Results of Calculations	354
5 Concluding Remarks	360
Acknowledgments	362
References	362
EXPLOSION SAFETY OF GASEOUS AND HETEROGENEOUS SYSTEMS IN INERT POROUS MEDIA	
<i>A. V. Pinaev and A. A. Vasil'ev</i>	365
1 Introduction	365
2 Experimental Methods	366
