Chapter One Solid Rocket Propulsion	1
CHAPTER SUMMARY	2
CONDENSED COMBUSTION PRODUCTS FROM BURNING OF NANOALUMINUM-BASED PROPELLANTS: PROPERTIES AND FORMATION MECHANISM <i>V. Babuk, A. Glebov, I. Dolotkazin, A. Conti, L. Galfetti, L. T. DeLuca, and A. Vorozhtsov</i>	3
1 Introduction	3
2 Experimental Techniques	5
3 Results	6
4 Physical Concept of Condensed Combustion Product Formation	11
5 Concluding Remarks	14
Acknowledgments	14
References	14
ALUMINUM NANOPARTICLES BURNING — STILL A PUZZLE? <i>A. A. Gromov and E. M. Popenko</i>	17
1 Introduction	17
2 Experiment and Discussion	18
3 Concluding Remarks	28
Acknowledgments	28
References	28
NEW HIGH ENERGETIC COMPOSITE PROPELLANTS FOR SPACE APPLICATIONS: REFRIGERATED SOLID PROPELLANT <i>C. Franson, O. Orlandi, C. Perut, G. Fouin, C. Chauveau, I. Gökalp, and M. Calabro</i>	31
1 Introduction	31
2 Theoretical Performance Calculations	32
3 Operation and Definition of the Firing Composition	34
	xi

4	Small-Scale Firing Test	37
5	Bates Firing	42
6	Concluding Remarks	45
	Acknowledgments	45
	References	45
STUDIES ON THE BURNING OF MICRO- AND NANOALUMINUM PARTICLE CLOUDS IN AIR		
	<i>P. Escot Bocanegra, V. Sarou-Kanian, D. Davidenko, C. Chauveau, and I. Gökalp</i>	47
1	Introduction	47
2	Experimental Setup and Methods	48
3	Experimental Results	49
4	Laminar Flame Model for Nanoparticle Cloud	52
5	Numerical Results	58
6	Concluding Remarks	61
	Acknowledgments	61
	References	61
THE WAYS FOR DEVELOPMENT OF ENVIRONMENTALLY SAFE SOLID COMPOSITE PROPELLANTS		
	<i>D. B. Lempert, G. B. Manelis, and G. N. Nechiporenko</i>	63
1	Introduction	63
2	Major Toxic Combustion Products of Solid Composite Propellants Released into Environment	64
3	Possibilities of Developing Propellants Based on Ammonium Perchlorate with Substantially Improved Environmental Performance	66
4	Formulations Based on Halide-Free Oxidizers	68
5	A Possibility to Substantially Enhance Energy Potential of Solid Composite Propellants Through Introduction of Aluminum Hydride	76
6	The Ways to Secure Necessary Combustion Properties of Solid Composite Propellants	77
7	Concluding Remarks	79
	References	79
AMMONIUM NITRATE AS AN OXIDIZER IN SOLID COMPOSITE PROPELLANTS		
	<i>G. B. Manelis and D. B. Lempert</i>	81
1	Introduction	81
2	The Objects and Criteria for Comparison	82
3	Energy Potential of the Formulations	83

4	Stability of Ammonium Nitrate, Its Compatibility with Other Components of Solid Composite Propellants, and the Problem of Phase Stability	88
5	Concluding Remarks	96
	References	96
METALLIZED SOLID ROCKET PROPELLANTS BASED ON AN/AP AND PSAN/AP FOR ACCESS TO SPACE		
	<i>S. Levi, D. Signoriello, A. Gabardi, M. Molinari, L. Galfetti, L. T. DeLuca, S. Cianfanelli, and G. F. Klyakin</i>	97
	Nomenclature	97
1	Background	97
2	Phase Stabilized Ammonium Nitrate	100
3	Metallized Dual-Oxidizer Formulations	100
4	Experimental Results	102
5	Concluding Remarks	107
	References	108
MODELING OF DIFFUSION AND PREMIXED FLAME OF AP/HTPB LAMINATE PROPELLANT		
	<i>F. Maggi, L. T. DeLuca, G. Colombo, A. Bandera, and L. Galfetti</i>	109
1	Introduction	109
2	Flame and Numerical Model Description	111
3	Real Propellant Combustion	114
4	Frames from Experimental Tests	115
5	Application of Combustion Model	116
6	Concluding Remarks	118
	Acknowledgments	119
	References	119
RADIANT IGNITION STUDIES OF AMMONIUM PERCHLORATE BASED PROPELLANTS		
	<i>A. I. Atwood, K. P. Ford, D. T. Bui, P. O. Curran, and T. Lyle</i>	121
1	Introduction	121
2	Background	122
3	Experiment	123
4	Samples	125
5	Results	128
6	Summary and Concluding Remarks	136
	References	139

P80 SRM LOW TORQUE FLEX-SEAL DEVELOPMENT —
THERMAL AND CHEMICAL MODELING OF MOLDING
PROCESS

<i>C. Descamps, E. Gautronneau, G. Rousseau, and M. Daurat</i>	141
1 Introduction	141
2 Flex-Seal Description	142
3 Manufacturing Process and Subscale Preliminary Modeling	143
4 Chemical Modeling of Rubber-Curing	145
5 Application to P80 Scale	150
6 Concluding Remarks	151
Acknowledgments	152
References	152

Chapter Two Liquid and Gelled Rocket Propulsion 153

CHAPTER SUMMARY	154
----------------------------------	-----

IGNITION OF A GASEOUS METHANE/OXYGEN COAXIAL JET

<i>C. Pauly, J. Sender, and M. Oswald</i>	155
Nomenclature	155
1 Introduction	155
2 Experimental Setup	157
3 Ignition Phenomenology	160
4 Flame Stabilization	165
5 Summary and Concluding Remarks	167
Acknowledgments	169
References	169

INFLUENCE OF CURVATURE IN REGENERATIVE COOLING
SYSTEM OF ROCKET ENGINE

<i>Y. Torres, L. Stefanini, and D. Suslov</i>	171
1 Introduction	171
2 Numerical Simulations	174
3 Numerical Model	175
4 Effects of Curvature	179
5 Concluding Remarks	183
References	183

NUMERICAL SIMULATION OF OPERATION PROCESSES
IN THE COMBUSTION CHAMBER AND GAS GENERATOR
OF OXYGEN-METHANE LIQUID ROCKET ENGINE

<i>G. P. Kalmykov, A. A. Larionov, D. A. Sidlerov, and L. A. Yanchilin</i>	185
1 Introduction	185

2	Gas Generator with Coaxial-Jet Injectors	186
3	Flow Core Element of Combustion Chamber with Coaxial-Jet Injectors Operating in the Cycle of Fuel-Rich Generator Gas Afterburning	190
4	Combustion Chamber with Impinging-Jet Injectors	197
5	Concluding Remarks	203
	References	203
INVESTIGATION OF COMBUSTION CHAMBER ACOUSTICS AND ITS INTERACTION WITH LO _x /H ₂ SPRAY FLAMES		
	<i>M. Oswald and B. Knapp</i>	205
1	Introduction	205
2	Experimental Setup	206
3	Data Reduction	209
4	Experimental Results	213
5	Summary and Concluding Remarks	223
	References	223
MODELING THE VAPORIZATION OF GEL FUEL DROPLETS		
	<i>A. Kunin, B. Natan, and J. B. Greenberg</i>	225
	Nomenclature	225
1	Introduction	226
2	Problem Description and Mathematical Model	228
3	Solution	233
4	Results	233
5	Concluding Remarks	235
	References	235
GENERALIZED REYNOLDS NUMBER FOR NON-NEWTONIAN FLUIDS		
	<i>K. Madlener, B. Frey, and H. K. Ciezki</i>	237
	Nomenclature	237
1	Introduction	238
2	Herschel–Bulkley-Extended Generalized Reynolds Number	241
3	Validation and Experimental Results	244
4	Summary	249
	References	250

Chapter Three	Fluid/Structure Interactions in Space/Launch Vehicles	251
	CHAPTER SUMMARY	252
	PROPELLANT BEHAVIOR IN LAUNCHER TANKS: AN OVERVIEW OF THE COMPERE PROGRAM	
	<i>M. Dreyer</i>	253
	1 Introduction	253
	2 Programmatic Status	255
	3 Work Logic of Compere	256
	4 Propelled Flight Phase	257
	5 Ballistic Phase	258
	6 Preparation of Restart	261
	7 Benchmark Tests	263
	8 Anticipated Flight Experiments	264
	9 Outlook	265
	Acknowledgments	265
	References	265
	EXPERIMENTAL AND NUMERICAL RESULTS OF SLOSHING WITH CRYOGENIC FLUIDS	
	<i>J. Lacapere, B. Vieille, and B. Legrand</i>	267
	1 Introduction	267
	2 Tests Description	268
	3 Numerical Approach	271
	4 Results and Discussion	273
	5 Concluding Remarks	277
	References	277
	LIQUID SLOSHING IN CYLINDRICAL FUEL TANKS	
	<i>E. J. Hopfinger and V. Baumbach</i>	279
	1 Introduction	279
	2 Lateral Forcing Experiments	280
	3 Impulsive Forcing and Axisymmetric Sloshing	286
	4 Concluding Remarks	291
	Acknowledgments	291
	References	291
	THE UNITED LAUNCH ALLIANCE DELTA IV VEHICLE — AN UPDATE TO THE PULSE SETTLING PROPELLANT MANAGEMENT APPROACH	
	<i>M. D. Berglund, Ch. E. Bassett, J. Mishic, and D. Schrage</i>	293
	1 Introduction	293
	2 Problem	296

3	Investigation	297
4	Pulse-Settling Approach to Propellant Management	298
5	Analex Computational Propellant Slosh Modeling	300
6	Flight Validation	304
7	Concluding Remarks	304
	References	304
VARIABLE TRANSFER METHODS FOR FLUID-STRUCTURE INTERACTION COMPUTATIONS WITH STAGGERED SOLVERS		
	<i>J. M. Vaassen, I. Klapka, B. Leonard, and C. Hirsch</i>	305
1	Introduction	305
2	Variable Transfer Through Nonconform Skin Meshes	307
3	Comparison of the Methods on a Simple Transfer	310
4	Hypersonic Compression Beam	313
5	Subsonic Flow Around a Wind Turbine Blade	316
6	Concluding Remarks	317
	References	317
Chapter Four	Pulsed/Continuous Detonation Propulsion	319
	CHAPTER SUMMARY	320
DETONATION INITIATION TECHNIQUES FOR PULSE DETONATION PROPULSION		
	<i>S. M. Frolov</i>	321
1	Concept of Fast Deflagration-to-Detonation Transition	321
2	Shaped Obstacles	324
3	Tube Coils	327
4	U-Bends	330
5	Deflagration-to-Detonation Transition in Liquid Hydrocarbon-Air Mixtures	333
6	Concluding Remarks	338
	Acknowledgments	338
	References	338
MODEL OF LOW-THRUST PULSE DETONATION DEVICE WITH VALVELESS FUEL FEED		
	<i>D. I. Baklanov, S. V. Golovastov, V. V. Golub, N. V. Semin, and V. V. Volodin</i>	341
1	Introduction	341
2	Experimental Setups	342

3	Results	345
4	Concluding Remarks	350
	Acknowledgments	350
	References	350
CONTINUOUS DETONATION WAVE ENGINE STUDIES FOR SPACE APPLICATION		
	<i>D. M. Davidenko, F. Jouot, A. N. Kudryavtsev, G. Dupré, I. Gökalp, E. Daniau, and F. Falempin</i>	353
1	Introduction	353
2	Continuous Detonation Wave Rocket Engine Operation . .	354
3	Continuous Detonation Wave Rocket Engine Demonstrator	355
4	Computational Study of Continuous Detonation Wave Rocket Engine	356
5	Experimental Study of the Detonation in a Two-Phase Cryogenic Flow	361
6	Concluding Remarks and Perspectives	365
	Acknowledgments	366
	References	366
DEFLAGRATION-TO-DETONATION TRANSITION UNDER INITIATION BY HIGH-VOLTAGE NANOSECOND DISCHARGES		
	<i>A. E. Rakitin, V. P. Zhukov, and A. Yu. Starikovskii</i>	367
1	Introduction	367
2	Detonation Initiation by Distributed Nanosecond Discharge	369
3	Detonation Initiation by Microsecond Spark Discharge . .	371
4	Detonation Initiation by Nanosecond Discharge in a Single-Cell Geometry	374
5	Concluding Remarks	376
	Acknowledgments	377
	References	377
Chapter Five Electric Propulsion for Spacecraft		379
	CHAPTER SUMMARY	380
VELOCITY AND TOTAL PRESSURE MEASUREMENTS IN THE TWO-STAGE HYBRID THRUSTER TIHTUS		
	<i>H. Böhrk and M. Auweter-Kurtz</i>	381
1	Thruster Concept	381
2	Experimental Apparatus	384

3	Methodology	388
4	Results and Interpretation	390
5	Summary and Concluding Remarks	396
	Acknowledgments	397
	References	397
STUDIES OF A DIRECT-CURRENT MICRODISCHARGE BASED MINIATURIZED PLASMA THRUSTER		
	<i>U. KC, J. Bingaman, P. L. Varghese, and L. L. Raja</i>	399
1	Introduction	399
2	Microdischarge Plasma Thruster Concept	401
3	Experiments	403
4	Results	404
5	Concluding Remarks	409
	Acknowledgments	409
	References	409
DEVELOPMENT OF KM-5 HALL EFFECT THRUSTER AND ITS FLIGHT TESTING ONBOARD GEO SPACECRAFT “EXPRESS-A4”		
	<i>V. N. Akimov, S. G. Baidakov, V. N. Galayko, O. A. Gorshkov, Y. M. Ermoshkin, V. A. Muravlev, A. V. Nikipelov, A. A. Sinitsin, V. F. Petrusevitch, V. N. Shutov, A. I. Vasin, and D. V. Volkov</i>	411
1	Introduction	411
2	Propulsion Unit Description	414
3	Propulsion Unit Qualification Activities	416
4	Integration of the Propulsion Unit with Spacecraft and Flight Tests	420
5	Concluding Remarks	424
	References	424
HISTORY AND CURRENT STATUS OF THE MICROWAVE ELECTROTHERMAL THRUSTER		
	<i>M. M. Micci, S. G. Bilén, and D. E. Clemens</i>	425
1	Introduction	425
2	Thruster Designs and Performance Results	427
3	Electromagnetic Interference Testing	432
4	Resonant Cavity Electromagnetic Modeling	434
5	Summary	436
	References	437

Chapter Six	Air-Breathing, Turbomachinery, and LAPCAT	439
	CHAPTER SUMMARY	440
	ACTIVE CONTROL OF COMBUSTORS AFTER TWENTY YEARS' EFFORTS	
	<i>F. E. C. Culick and S. Palm</i>	<i>441</i>
	1 Introduction	441
	2 Some Early Results	443
	3 Operational Active Control System	448
	4 Research on Active Control of Combustion, 1990–Present	450
	5 Some Experimental Results	458
	6 Concluding Remarks	463
	Acknowledgments	465
	References	465
	INVESTIGATION OF COMBUSTION IN MINIATURISED COMBUSTOR FOR APPLICATION TO MICRO GAS TURBINES	
	<i>J. Guidez, P. Roux, N. Poirson, E. Jourdanneau, M. Orain, and F. Grisch</i>	<i>469</i>
	Nomenclature	469
	1 Introduction	470
	2 Constraints for the Microcombustors	471
	3 Experimental Setup	471
	4 Thermal Measurements	472
	5 Species Concentrations and Temperature Measurements Using Rayleigh Scattering and Spontaneous Raman Spectroscopy	476
	6 Concluding Remarks	479
	References	480
	MID-AIR RETRIEVAL TECHNOLOGY FOR RETURNING OF REUSABLE LAUNCH VEHICLES' BOOSTERS	
	<i>S. V. Antonenko and S. A. Belavskiy</i>	<i>481</i>
	1 Technology Realization	481
	2 Universality and Adaptability	485
	3 Demonstration and Testing	487
	4 Economic Effectiveness	487
	5 Concluding Remarks	494
	References	494

A TETHERED UPPER STAGE FOR SMALL LAUNCHERS — PRELIMINARY ANALYSIS, DESIGN, AND TEST	
<i>A. Hyslop, E. J. van der Heide, M. Kruijff, C. Bonnal, C. Talbot, and A. Espinosa</i>	495
Acronyms	495
1 Introduction	495
2 Launch System Summary	496
3 Tether Theory	497
4 Mission Description	499
5 Launcher Conceptual Design	500
6 Hardware Design	502
7 Tether Trajectory	504
8 Monte Carlo Simulations	506
9 Comparison to Alternatives	507
10 Deployment Testing	508
11 Concluding Remarks	513
References	514
SUPERSONIC MIXING AND COMBUSTION: ADVANCE IN LES MODELING	
<i>A. Ingenito and C. Bruno</i>	515
1 Introduction	515
2 Large Eddy Simulations of Supersonic Combustion with the ISCM Model	516
3 Mixing and Combustion for Supersonic Flows	524
4 Concluding Remarks	528
Acknowledgments	529
References	529
IMPACT OF INTAKE BOUNDARY LAYER TURBULENCE ON THE COMBUSTION BEHAVIOR IN A SCRAMJET	
<i>A. Mack, J. Steelant, V. Togiti, and J. M. A. Longo</i>	531
1 Introduction	531
2 Generic Configuration	532
3 Numerical Modeling	534
4 Results	535
5 Summary	548
Acknowledgments	549
References	549

IN-FLIGHT OXYGEN COLLECTION FOR A TWO-STAGE AIR-LAUNCH VEHICLE: INTEGRATION OF VEHICLE AND SEPARATION CYCLE DESIGN	
<i>D. Verstraete, D. Bizzarri, and P. Hendrick</i>	551
1 Introduction	551
2 Conceptual Design of the Twin Fuselage Mothership	552
3 The LOx Collection and Air Separation Plant	561
4 Description of the Air Separation Test Unit	564
5 Vehicle — Separation Plant Integration	566
6 Concluding Remarks	567
References	567
THE MICROSPACE LAUNCHER: FIRST STEP TO THE FULLY AIR-BREATHING SPACE LAUNCHER	
<i>F. Falempin, M. Bouchez, and M. Calabro</i>	569
1 Introduction	570
2 Key Technology Issues	573
3 Aeropropulsive Balance Sensitivity	573
4 Propulsion System Concept	576
5 Need of a Variable Geometry Concept for Dual-Mode Ramjet	577
6 Air-Breathing Engine Integration	580
7 Axisymmetric Air-Breathing Launchers Family Studied	582
8 Stability and Control	587
9 Thermal Strength	588
10 Concluding Remarks	590
Acknowledgments	590
References	590
NUMERICAL SIMULATION OF AN AXIAL COMPRESSOR WITH NONAXISYMMETRIC CASING TREATMENT	
<i>N. Gourdain, M. Montagnac, and J. F. Boussuge</i>	593
Nomenclature	593
1 Introduction	594
2 Compressor Model	595
3 Simulation of Smooth Wall Case	601
4 Simulation with Casing Treatment	603
5 Concluding Remarks	605
Acknowledgments	606
References	606
COMPUTATIONS OF FLOWS OVER A TURBINE BLADE	
<i>R. S. Amano and C. Xu</i>	609
1 Introduction	609
2 Numerical Technique	611

3	Results and Discussion	614
4	Concluding Remarks and Recommendations	622
	Acknowledgments	623
	References	623
Chapter Seven	Ceramic Matrix Composites for Aerospace Applications	625
	CHAPTER SUMMARY	626
	PTAH-SOCAR FUEL-COOLED COMPOSITE MATERIALS STRUCTURE	
	<i>M. Bouchez and S. Beyer</i>	<i>627</i>
	Nomenclature	627
1	Introduction	628
2	Composite PTAH-SOCAR Technology	629
3	Complete Ducts Demonstration	636
4	Other Tests	640
5	Concluding Remarks	642
	Acknowledgments	642
	References	643
	DEVELOPMENT OF TECHNOLOGIES FOR A CMC-BASED COMBUSTION CHAMBER	
	<i>O. J. Haidn, J. Riccius, D. Suslov, S. Beyer, and O. Knab</i>	<i>645</i>
1	Introduction	645
2	Thrust Chamber Technologies	646
3	Nozzle Technologies	652
4	Concluding Remarks	657
5	Summary and Outlook	657
	References	657
	COMPUTATIONAL AND EXPERIMENTAL INVESTIGATIONS OF CARBON-CERAMIC COMPOSITE MATERIALS THERMOCHEMICAL RESISTANCE IN COMBUSTION PRODUCTS OF LIQUID ROCKET ENGINE	
	<i>V. V. Mironov, N. N. Volkov, L. I. Volkova, V. I. Kondratenko, V. A. Popov, and S. M. Tsatsuev</i>	<i>659</i>
1	Introduction	659
2	Physicochemical Destruction Model	659
3	Experimental Investigation	662
4	Concluding Remarks	665
	References	665

Chapter Eight	Engine Health Monitoring	667
	CHAPTER SUMMARY	668
	A QUADRATIC PROGRAMMING FRAMEWORK FOR CONSTRAINED AND ROBUST JET ENGINE HEALTH MONITORING	
	<i>S. Borguet and O. Léonard</i>	669
	Nomenclature	669
	1 Introduction	670
	2 Statement of the Problem	675
	3 Application Example	683
	4 Concluding Remarks	690
	References	690
	NONINTRUSIVE DIAGNOSTICS OF HIGH-TEMPERATURE MEDIA AND OBJECTS AT MOTOR TESTING	
	<i>V. V. Mironov, N. N. Volkov, L. I. Volkova, V. I. Kondratenko, V. A. Popov, L. B. Treshchalin, and S. M. Tsatsuev</i>	693
	1 Introduction. Measuring Complex	693
	2 Experimental Investigation	695
	3 Results	698
	4 Concluding Remarks	700
	References	700
