## ACKNOWLEDGMENTS

---

It is our pleasure to thank for their valuable and patient support:

- members of the Organizing Committee;
- members of the International Advisory Committee; and
- all conference participants including speakers, observers, and session chairs.

The present book would not have been possible without the support and careful work of the international college of reviewers purposely nominated for this task. The quality of any scientific book is largely due to the will of reviewers to share their expertise and knowledge with unknown colleagues from all over the world.

Last but not least, special thanks are due to our sponsors without which the 2015 conference would not have taken place: European Space Agency (ESA); Office National d'Etudes et de Recherches Aérospatiales (ONERA); Safran; Centre National d'Etudes Spatiales (CNES); Thalés Alenia Space; AIRBUS group; and Polish Space Agency.

We sincerely wish that this joint international effort will help all readers to gain a better understanding of aerospace flight dynamics, guidance, navigation, and control and to further widen the fascinating horizons of the aerospace world.

May 2017
