TORUS PRESS: Authoritative Editions on Propulsion Physics

EUCASS Advances in Aerospace Sciences Book Series

Vols. 1, 2, and 4. Progress in Propulsion Physics

L. DeLuca, C. Bonnal, O. Haidn, and S. Frolov, eds.

Vol. 3. Progress in Flight Physics

Ph. Reijasse, D. Knight, M. Ivanov, and I. Lipatov, eds.

Deflagrative and Detonative Combustion

G.D. Roy and S.M. Frolov, eds.

Pulsed and Continuous Detonations

G.D. Roy, S.M. Frolov, and J.O. Sinibaldi, eds.

Pulse and Continuous Detonation Propulsion

G.D. Roy and S.M. Frolov, eds.

Application of Detonation to Propulsion

G.D. Roy, S.M. Frolov, and J.E. Shepherd, eds.

Confined Detonation and Pulse Detonation Engines

G.D. Roy, S.M. Frolov, R.J. Santoro, and S.A. Tsyganov, eds.

Advances in Confined Detonations

G.D. Roy, S.M. Frolov, R.J. Santoro, and S.A. Tsyganov, eds.

Space Challenges in XXI Century.

Vol. 1. Rocket Motors and Problems of Space Exploration

I.G. Assovskiy and O.J. Haidn, eds.

Vol. 2. Novel Materials and Technologies: Nanocomposites

A.A. Berlin and I.G. Assovskiy, eds.

Vol. 3. Novel Materials and Technologies for Space Rockets and Space Development

A.A. Berlin and I.G. Assovskiy, eds.

Vol. 4. Chemical and Radiation Physics

I. Assovskiy, A. Berlin, G. Manelis, and A. Merzhanov, eds.

Nonequilibrium Processes

Vol. 1. Combustion and Detonation

G.D. Roy, S.M. Frolov, and A.M. Starik, eds.

Vol. 2. Plasma, Aerosols, and Atmospheric Phenomena

G.D. Roy, S.M. Frolov, and A.M. Starik, eds.

Nonequilibrium Phenomena

A.M. Starik and S.M. Frolov, eds.

Combustion and Pollution: Environmental Impact

G.D. Roy, S.M. Frolov, and A.M. Starik, eds.

Turbomachines: Aeroelasticity, Aeroacoustics, Unsteady Aerodynamics

V. Skibin, V. Saren, N. Savin, and S. Frolov, eds.

Volume 5

Progress in Flight Physics

Edited by

Philippe Reijasse

ONERA, The French Aerospace Lab
Meudon, France

Doyle D. Knight

Rutgers, The State University of New Jersey
New Brunswick, NJ, USA

Mikhail S. Ivanov

Institute of Theoretical and Applied Mechanics
Novosibirsk, Russia

Igor I. Lipatov

Central Aerohydrodynamic Institute
Zhukovsky, Russia

Progress in Flight Physics. Vol. 5 / [Edited by Ph. Reijasse, D. Knight, M. Ivanov, and I. Lipatov]. — 736 p., ill. 419. (EUCASS advances in aerospace sciences book series.)

ISBN 978-2-7598-0877-9

The book contains 37 selected, revised, and thoroughly edited papers addressing various issues of flight physics written by world-known experts. The papers include critical analyses of previous studies and controversial aspects of novel flight concepts, new theoretical and experimental results and findings as well as numerous references to archival publications worldwide. The book is organized in 9 chapters: (1) Turbulence Modeling; (2) Boundary Layer Stability; (3) Flow Control; (4) Vortex, Wake, and Base Flows; (5) Shock Interaction; (6) Hypersonics; (7) Reentry; (8) Real Gases and Rarefied Flows; and (9) Configuration Aerodynamics, Sonic Boom, and Aircraft Aerodynamic Model. The volume was prepared as a reference for research scientists and practicing engineers in the field of flight physics.
