Chapter One HANDLING QUALITIES	1
CHAPTER Background	2
THEORETICAL AND EXPERIMENTAL METHODS TO SELECT AIRCRAFT HANDLING QUALITIES	
<i>L. E. Zaichik, Y. P. Yashin, V. S. Perebatov, and P. A. Desyatnik</i>	3
1 Introduction	3
2 Theoretical Approach to Estimate the Effect of Motion Cues	5
3 Method to Correct On-Ground Simulation Results	10
4 Concluding Remarks	15
References	15
NEW AIRCRAFT CONFIGURATIONS HANDLING QUALITIES STUDIES BASED ON THE AERODYNAMIC INVARIANT CONCEPT	
<i>J. Bazile</i>	17
Nomenclature	17
1 Introduction	18
2 Longitudinal Aerodynamic Invariant Identification and Link with New Aircraft Configurations	19
3 Aerodynamic Invariant Effect on Aircraft Dynamics	29
4 Concluding Remarks	31
References	32
	xi

Chapter Two	NAVIGATION AND ESTIMATION	33
	CHAPTER Background	34
	REAL-TIME ESTIMATION OF PROJECTILE ROLL ANGLE USING MAGNETOMETERS: IN-LAB EXPERIMENTAL VALIDATION	
	<i>S. Changey, E. Pecheur, P. Wey, and E. Sommer</i>	35
	1 Guided Supersonic Projectile	35
	2 Navigation and Control	37
	3 In-Lab Experimental Validation	41
	4 Concluding Remarks and Outlooks	44
	References	44
	USING DISTRIBUTED MAGNETOMETRY IN NAVIGATION OF HEAVY LAUNCHERS AND SPACE VEHICLES	
	<i>N. Praly, P.-J. Bristeau, J. Laurent-Varin, and N. Petit</i>	45
	1 Introduction	45
	2 Magneto-Inertial Navigation	46
	3 Model of Earth Magnetic Field and Evaluation of Its Gradient	50
	4 Performance of Magneto-Inertial Navigation During a Geosynchronous Transfer Orbit Mission	51
	5 Concluding Remarks	53
	References	54
	ATTITUDE ESTIMATION OF THE DELFI-n3Xt SATELLITE	
	<i>D. Choukroun, A. Maas, and J. M. Kuiper</i>	55
	1 Introduction	55
	2 Mathematical Modeling	57
	3 Sun Vector Determination System	67
	4 Attitude Determination Example	74
	5 Concluding Remarks	79
	Acknowledgments	80
	References	80
	INTEGRATED COMMUNICATIONS AND OPTICAL NAVIGATION SYSTEM	
	<i>J. Mueller, G. Pajer, and M. Paluszek</i>	81
	Nomenclature	81
	1 Introduction	82
	2 Overall System Design	84
	3 Simulation Results	93
	4 Concluding Remarks	95
	Acknowledgments	95
	References	95

PLANETARY ROVER NAVIGATION: IMPROVING VISUAL
ODOMETRY VIA ADDITIONAL IMAGES AND MULTISENSOR
FUSION

<i>G. Casalino, E. Zereik, E. Simetti, A. Turetta, S. Torelli, and A. Sperindé</i>	97
1 Introduction	97
2 Visual Odometry Based Additional Image Processing	98
3 State Estimation	100
4 Sequence Estimation	107
5 Exploiting Multiple Sensors	112
6 Concluding Remarks and Comments	119
References	120

Chapter Three GUIDANCE AND CONTROL 121

CHAPTER Background 122

MISSION ANALYSIS AND GUIDANCE, NAVIGATION,
AND CONTROL DESIGN FOR RENDEZVOUS AND DOCKING
PHASE OF ADVANCED REENTRY VEHICLE MISSION

<i>L. Strippoli, P. Colmenarejo, and H. Strauch</i>	123
1 Introduction	123
2 Analysis of Approach Trajectories	124
3 Guidance, Navigation, and Control Design	129
4 Advanced Reentry Vehicle Functional Engineering Simulator and Preliminary Results	134
5 Concluding Remarks	135
References	135

MODEL PREDICTIVE CONTROL APPLICATION
TO SPACECRAFT RENDEZVOUS IN MARS SAMPLE
RETURN SCENARIO

<i>M. Saponara, V. Barrena, A. Bemporad, E. N. Hartley, J. Maciejowski, A. Richards, A. Tramutola, and P. Trodden</i>	137
1 Introduction	137
2 The High-Integrity Autonomous Rendezvous and Docking Control System Study	139
3 The MPCTOOL	141
4 The ORCSAT MPC Design	143
5 The Online Reconfiguration Control System and Avionics Architecture	151

6	Simulation Results and Comparisons	153
7	Concluding Remarks	156
	References	156
A PRACTICAL RECEDING HORIZON CONTROL FRAMEWORK FOR PATH PLANNING AND CONTROL OF AUTONOMOUS VTOL VEHICLES		
	<i>C. Liu and W.-H. Chen</i>	159
1	Introduction	159
2	Vehicle Model	161
3	Path Planning and Tracking Control	164
4	Simulation	170
5	Summary and Future Work	172
	References	173
AIRCRAFT PITCH ATTITUDE ADAPTIVE CONTROL VIA SINGULAR PERTURBATION TECHNIQUE		
	<i>V. D. Yurkevich</i>	175
1	Introduction	175
2	Aircraft Control Problem	177
3	Controller Design Via Time-Scale Separation	179
4	Adaptive Proportional-Integral-Derivative Controller	182
5	Simulation Results	184
6	Concluding Remarks	185
	References	187
ATTITUDE CONTROL SYSTEM OF THE DELFI-N3XT SATELLITE		
	<i>J. Reijneveld and D. Choukroun</i>	189
1	Introduction	190
2	Attitude Control System Design	191
3	Simulation	198
4	Concluding Remarks	206
	Acknowledgments	207
	References	207
VEGA ROLL AND ATTITUDE CONTROL SYSTEM ALGORITHMS TRADE-OFF STUDY		
	<i>N. Paulino, G. Cuciniello, I. Cruciani, F. Corraro, D. Spallotta, and F. Nebula</i>	209
1	Introduction	209
2	Roll and Attitude Control System Design Tool Simulator	211
3	Algorithms Description	215
4	Trade-Off Analysis	221

5	Trade-Off Results	224
6	Concluding Remarks	228
	References	228
 Chapter Four FAULT DETECTION AND CONTROL		229
	CHAPTER Background	230
	THE CHALLENGE OF ADVANCED MODEL-BASED FDIR TECHNIQUES FOR AEROSPACE SYSTEMS: THE 2011 SITUATION	
	<i>A. Zolghadri</i>	231
	Nomenclature	231
1	Introduction	232
2	Brief Review of the Industrial State-of-Practice	233
3	Interaction Between Fault Detection and Diagnosis, Fault Tolerant Control, and Fault Tolerant Guidance	236
4	Brief Review of Advanced Academic Results	237
5	Advanced Model-Based Fault Detection and Isolation Techniques for Aerospace Systems	238
6	Recovery Aspects	240
7	Future Challenges and Opportunities	242
8	Concluding Remarks	243
	Acknowledgments	244
