Preface

vii

Chapter 1 Fuel Compositions	1
Chemmotology of detonation engines	
<i>S. M. Frolov and I. O. Shamshin</i>	3
Thermodynamic properties of monomers and dimers of triethylaluminum and triethylboron	
<i>G. A. Poskrebyshev and S. M. Frolov</i>	20
Kinetic model for four-component	
<i>i</i> C ₈ H ₁₈ / <i>i</i> C ₁₆ H ₃₄ / <i>n</i> C ₁₂ H ₂₆ / <i>n</i> C ₁₀ H ₂₂ synthetic isoparaffin	
fuel surrogates: Development and application	
<i>V. A. Savelieva, A. M. Savel'ev, A. N. Tarasenko, and S. A. Torokhov</i>	33
The blowout limits and emission characteristics of lean-burn combustors on alternative fuels	
<i>A. M. Savel'ev, V. A. Savelieva, I. N. Kadochnikov, and D. V. Novakovsky</i>	42
Nano- and microparticles of aluminum — rocket fuel with catalytic properties	
<i>K. A. Moldosanov and V. M. Lelevkin</i>	51
Chapter 2 Kinetics of Mixing, Ignition, and Combustion	65
Problems of description of the process of oxide formation during combustion of aluminum particles in condensed systems	
<i>V. A. Babuk and N. L. Budnyi</i>	67
Explosive fragmentation of heterogeneous liquids under intensive microwave heating	
<i>D. V. Antonov</i>	83
A model of nonequilibrium volumetric condensation of boron oxide with correction for the geometry and thermodynamics of simple boron oxide clusters	
<i>A. M. Savel'ev and V. V. Bernikov</i>	86
Theoretical investigation of polycyclic aromatic hydrocarbon growth mechanisms during <i>p</i> -xylene combustion	
<i>A. S. Semenikhin, A. A. Nikolaev, A. M. Golenko, A. S. Savchenkova, and S. G. Matveev</i>	95

The effect of electric field on the ignition of gaseous fuel–air mixtures	
<i>V. S. Arutyunov, K. Ya. Troshin, A. A. Zakharov, A. A. Belyaev, A. V. Arutyunov, D. V. Maksimova, and A. A. Blahin</i>	102
Hyperspectral imaging of propane–air flame self-luminosity	
<i>V. S. Ivanov, S. M. Frolov, V. S. Aksenov, I. V. Semenov, I. D. Rodionov, A. N. Vinogradov, and M. A. Gomorev</i>	111
Chapter 3 Shock and Detonation Waves in Gases and Gas Suspensions	129
Numerical study of the effect of symmetry violations ($D_n \rightarrow C_2$) in converging shock waves on thermodynamic conditions and vortex mixing in the focal region	
<i>A. V. Konyukhov and T. A. Rostilov</i>	131
Numerical investigation of the influence of endothermic reactions and periodic nonuniformities on the dynamics of one-dimensional gaseous detonations	
<i>F. Belolutskiy and A. Kasimov</i>	144
Propagation of detonation waves in a tube with conical contraction of cross section	
<i>V. S. Aksenov, V. S. Ivanov, I. A. Sadykov, I. O. Shamshin, and S. M. Frolov</i>	151
Numerical simulation of heterogeneous detonation propagation in layers of aluminum–air gas suspension	
<i>S. A. Lavruk and A. A. Afanasenkov</i>	168
Computational and laboratory studies in magnetoplasmic aerodynamics and plasma actuators	
<i>V. V. Kuzenov and S. V. Ryzhkov</i>	173
Physics of plasma precursors for detonation and shock waves	
<i>V. A. Levin, M. Ya. Ivanov, and V. V. Markov</i>	180
Chapter 4 Applications of Detonation	193
Pulsed-shock-induced atomization of free-falling melt streams for metal powder production	
<i>I. O. Shamshin, V. S. Aksenov, V. S. Ivanov, A. E. Zangiev, S. M. Frolov, and F. S. Frolov</i>	195
Dynamics of nanodiamond sizes during detonation of charges with a diameter of 20–40 mm	
<i>K. A. Ten and I. A. Rubtsov</i>	203

Research on the explosion load characteristics of aluminized explosives near the wall in deep water	
<i>Yuanxiang Sun</i>	215
Test fires of the pulsed detonation thrust module: Thrust, thermal state, vibrations, noise, and service lifetime	
<i>S. M. Frolov, V. S. Ivanov, V. S. Aksenov, I. O. Shamshin, P. A. Gusev, and A. E. Zangiev</i>	221
A periodic truster using detonation combustion	
<i>Yu. I. Tsybizov</i>	234
Two-stage combustion as one of the mechanisms for increasing the thrust of an ejector pulse jet engine	
<i>K. K. Migalin, I. P. Boychuk, A. V. Grinek, and D. N. Pereygin</i>	240
Three methods of combustion acceleration in an ejector pulse jet engine	
<i>G. A. Glebov and K. K. Migalin</i>	244
Continuous detonation combustor operating on methane–oxygen propellant: Test fires, thrust performance, and thermal state	
<i>V. S. Ivanov, S. M. Frolov, I. O. Shamshin, and Yu. V. Kozarenko</i>	248
Methodological aspects of preparing and conducting comparative test fires of detonation-driven and conventional liquid propellant rocket engines in full-scale conditions at high altitudes	
<i>V. Yu. Aleksandrov, K. Yu. Arefyev, I. M. Grishin, V. V. Ligostaev, A. N. Prokhorov, R. S. Sidorov, N. B. Ponomarev, A. Yu. Chesnokova, V. S. Ivanov, S. M. Frolov, N. V. Glukhov, D. Yu. Baymukhametov, A. D. Eliseev, P. A. Brivkalin, and Yu. Yu. Stepanishchev</i>	265
Results of comparative test fires of rocket engine chambers with continuous-detonation and deflagration combustion using natural gas–oxygen components	
<i>V. Yu. Aleksandrov, K. Yu. Arefyev, I. M. Grishin, V. V. Ligostaev, A. N. Prokhorov, R. S. Sidorov, N. B. Ponomarev, A. Yu. Chesnokova, V. S. Ivanov, S. M. Frolov, N. V. Glukhov, D. Yu. Baymukhametov, A. D. Eliseev, P. A. Brivkalin, and Yu. Yu. Stepanishchev</i>	274
Calculation of parameters of high-velocity combustion and spinning detonation in the annular-type continuous-detonation combustors	
<i>M. Yu. Vovk and V. V. Kulalaev</i>	285

Gasification of food industry waste with high-temperature gas detonation products	
<i>K. A. Avdeev, P. O. Vinogradov, A. B. Vorobyov, Ya. S. Dudko, A. V. Evlanov, A. V. Inozemtsev, Ya. O. Inozemtsev, M. I. Molodid, I. A. Sadykov, A. S. Silantiev, V. A. Smetanyuk, S. M. Frolov, F. S. Frolov, and Ya. K. Hasyak</i>	291
Conditions for self-feeding a pulsed detonation gun with generator gas obtained during gasification of organic waste	
<i>K. A. Avdeev, P. O. Vinogradov, A. B. Vorobyov, Ya. S. Dudko, A. V. Evlanov, A. V. Inozemtsev, Ya. O. Inozemtsev, M. I. Molodid, I. A. Sadykov, A. S. Silantiev, V. A. Smetanyuk, S. M. Frolov, F. S. Frolov, and Ya. K. Hasyak</i>	317
Production of ethylene and acetylene by pulsed shock compression of natural gas	
<i>K. A. Avdeev, A. E. Kovalev, S. M. Frolov, and F. S. Frolov</i>	341
