Chapter 1	Mixing, Combustion, and Deflagration-to-Detonation Transition	1
On the knock characteristics of gas fuels	<i>V. S. Arutyunov, A. V. Arutyunov, and L. N. Strekova</i>	3
Numerical modeling of high-speed mixing and combustion in inhomogeneous hydrogen–air mixtures	<i>R. S. Solomatin and I. V. Semenov</i>	8
Combustion features of fragmenting droplets of composite liquid biofuels	<i>D. S. Romanov, V. V. Dorokhov, P. A. Strizhak, and K. Yu. Vershinina</i>	13
Fragmentation and combustion of liquid biofuel droplets in power plants and engines	<i>D. V. Antonov, O. V. Vysokomornaya, L. S. Yanovskiy, and P. A. Strizhak</i>	17
Organization of pulse combustion mode in the air suspension flow	<i>A. G. Egorov and A. S. Tizilov</i>	25
Combustion of energy-saturated composites based on fragmented porous silicon in inert media and air	<i>V. N. Mironov, E. S. Golomako, P. N. Krivosheyev, O. G. Penyazkov, and K. L. Sevrouk</i>	29
Experimental proof of the possibility of shock wave amplification in a two-phase mixture of superheated steam and triethylaluminum	<i>K. A. Byrdin, I. O. Shamshin, V. S. Aksenov, K. A. Avdeev, S. M. Frolov, P. A. Storozhenko, and S. L. Guseinov</i>	36

Indoor natural gas explosions classification <i>V. F. Martynyuk and P. N. Bugaev</i>	47
Deflagration-to-detonation transition in a semiconfined slit combustor with separate supply of fuel and oxidizer <i>I. O. Shamshin, V. S. Ivanov, V. S. Aksenov, P. A. Gusev, and S. M. Frolov</i>	51
Chapter 2 Detonation	59
Simulation of deflagration and detonation in hydrogen–air mixtures <i>P. E. Belyaev, I. R. Makeyeva, D. A. Mastyuk, and E. E. Pigasov</i>	61
Theoretical stability analysis of detonation for Majda’s model with more realistic ignition function <i>Yuanxiang Sun</i>	67
Detonation in combustible gas upon impinging of a shock wave on a gas bubble of increased density <i>O. G. Sutyrin, P. Yu. Georgievskiy, and V. A. Levin</i>	70
Stationary configurations with detonation waves in supersonic flows <i>A. V. Trotsyuk</i>	74
Pressure pulsations in a cylindrical combustion chamber and air manifold during continuous spin detonation with supersonic collector outflow <i>A. N. Samsonov, F. A. Bykovskii, and E. F. Vedernikov</i>	79
Detonation of fuel-rich mixtures of gaseous industrial hydrocarbons with oxygen <i>A. A. Shtertser, I. S. Batraev, D. K. Rybin, and V. Yu. Ulianitsky</i>	84
Pressure measurements in rotating detonation engines by remote sensors <i>V. S. Ivanov, A. E. Zangiev, A. E. Kovalev, and S. M. Frolov</i>	90
Detonation propagation in two-phase systems gaseous oxidizer–liquid fuel droplets <i>V. S. Ivanov and S. M. Frolov</i>	95

Chapter 3 Application of Pulsed and Continuous Deflagrations and Detonations	101
Controlled reflection of compression waves generated by pulsating combustion as a way to increase thrust of ejector pulsejet engine with a double bend gas duct <i>K. V. Migalin, K. A. Sidenko, K. K. Migalin, I. P. Boychuk, and D. A. Charntsev</i>	103
Combustion investigation in an ejector pulsejet engine using the reconstruction of dynamic system equations from the observed implementations <i>I. P. Boychuk, A. V. Grinek, S. Y. Aleksiants, A. M. Fischenko, and K. V. Migalin</i>	109
Gasification of liquid hydrocarbon wastes with high-temperature gaseous detonation products: Thermodynamic calculation <i>K. S. Panin, V. A. Smetanyuk, and S. M. Frolov</i>	112
Gasification of liquid hydrocarbon waste with high-temperature gaseous detonation products: Experiment <i>I. A. Sadykov, A. S. Silantiev, V. A. Smetanyuk, S. M. Frolov, F. S. Frolov, Y. K. Hasiak, A. B. Vorobyov, A. V. Inozemtsev, and Ya. O. Inozemtsev</i>	120
Removal of organic fractions from printed circuit boards by pulsed detonation waves <i>S. M. Frolov, V. A. Smetanyuk, A. S. Silantiev, I. A. Sadykov, F. S. Frolov, Y. K. Hasiak, A. A. Shiryayev, and V. E. Sitnikov</i>	127
Gasification of brown coals with products of gas detonation <i>K. A. Avdeev, A. S. Silantiev, V. A. Smetanyuk, V. G. Piletsky, F. S. Frolov, and S. M. Frolov</i>	134
