

CONTENTS

Part I PLENARY LECTURES	1
Orthonectida and Dicyemida: Two stories of body plan simplification <i>V. V. Aleoshin, G. S. Slyusarev, K. V. Mikhailov, L. Yu. Rusin, O. V. Popova, O. A. Zverkov, and V. A. Lyubetsky</i>	3
Towards an Encyclopedia of Sequence Biology <i>A. Bolshoy</i>	5
Diversity of genomic variants and population genetics of ethnic and regional groups across Russia <i>V. Brukhin, D. V. Zhernakova, S. Malov, T. K. Oleksyk, K. P. Koepfli, A. Zhuk, P. Dobrynin, S. Kliver, N. Cherkasov, G. Tamazian, M. Rotkevich, K. Krashennikova, I. Evsyukov, S. Sidorov, A. Gorbunova, E. Chernyaeva, A. Shevchenko, S. Kolchanova, A. Komissarov, S. Simonov, A. Antonik, A. Logachev, D. E. Polev, A. S. Glotov, V. Ulantsev, E. Noskova, T. K. Davydova, T. M. Sivtseva, S. Limborska, O. Balanovsky, V. Osakovsky, A. Novozhilov, V. Puzyrev, N. Kropachev, and S. J. O'Brien</i>	6
Coevolution of chromosome changes and gene regulation in ruminants <i>M. Farré, J. Kim, A. A. Proskurjakova, Y. Zhang, A. I. Kulemzina, Q. Li, Y. Zhou, Y. Xiong, J. L. Johnson, P. Perelman, W. Johnson, W. Warren, A. V. Kukekova, G. Zhang, S. J. O'Brien, O. A. Ryder, A. S. Graphodastky, J. Ma, H. A. Lewin, and D. M. Larkin</i>	8
Building catalogue of life: Ultrahigh throughput DNA barcoding using third generation sequencing <i>P. D. N. Hebert, T. W. A. Braukmann, S. W. J. Prosser, S. Ratnasingham, J. R. deWaard, N. V. Ivanova, D. H. Janzen, W. Hallwachs, S. Naik, J. E. Sones, and E. V. Zakharov</i>	10
“Noah’s Ark” project: How Moscow University works on biodiversity <i>P. Kamenski</i>	11
Do modern molecular data fit concepts of Neo-Darwinism, molecular phylogenetics, and DNA barcoding? <i>Yu. Ph. Kartavtsev</i>	12
On the origin of species by means of tumor progression, or the preservation of transmissible cancers in the struggle for life <i>A. Y. Panchin, V. V. Aleoshin, and Y. V. Panchin</i>	14

Evolutionary biophysics of P-loop nucleoside triphosphatases <i>D. N. Shalaeva, D. A. Cherepanov, M. Y. Galperin, and A. Y. Mulkidjanian</i>	16
Evolution in superdiverse ecosystems: Insights from molecular phylogenetics <i>D. Sherbakov</i>	20
Epigenetics and evolution <i>B. F. Vanyushin</i>	22
Part II SECTION CONTRIBUTIONS	25
Conservatism of miRNA binding site in mRNA of <i>IGFBP3</i> gene and its orthologous genes <i>D. Aisina, R. Niyazova, S. Atambayeva, and A. Ivashchenko</i>	27
New variable chloroplast markers for evaluating phylogeny within the sect. <i>Leiostipa</i> genus <i>Stipa</i> L. (Poaceae) <i>E. Baiakhmetov and P. D. Gudkova</i>	28
Assembly and comparative analysis of some apomictic <i>Boechera</i> species genomes <i>V. Brukhin, S. Kliver, M. Rayko, A. Komissarov, E. Bakin, C. Rushworth, T. Mitchell-Olds, and U. Grossniklaus</i>	29
The diversity of Carotenogenic Microalgae of the Kandalaksha Bay of the White Sea Subpolar Region <i>K. Chekanov, A. Kublanovskaya, T. Fedorenko, and E. Lobakova</i>	31
Phylogeography of <i>Aegilops tauschii</i> Coss. as revealed by <i>Got2</i> DNA sequences <i>A. Dudnikov</i>	32
Molecular phylogenetic approach reveals semicryptic species among common epiphytic bryophytes <i>V. E. Fedosov, A. V. Fedorova, E. A. Ignatova, and M. S. Ignatov</i>	33
Adaptation to high latitudes and its influence on genetic predisposition to multiple sclerosis <i>M. Fridman, P. Bycadarov, N. Oparina, and V. Makeev</i>	35
Applications of genome sequence data for understanding microbial phylogeny and identifying novel characteristics of different microbes <i>R. S. Gupta</i>	36
Genetic diversity of marginal populations of two bears species: Brown bear <i>Ursus arctos</i> Linnaeus, 1758 and Asian black bear <i>Ursus thibetanus</i> G. Cuvier, 1823 <i>V. Yu. Guskov</i>	38

Lack of host specificity of copepod crustaceans associated with mushroom corals in the Red Sea <i>V. N. Ivanenko, B. W. Hoeksema, S. V. Mudrova, M. A. Nikitin, A. Martínez, N. N. Rimskaya-Korsakova, M. L. Berumen, and D. Fontaneto</i>	39
Genogeography of the sable (<i>Martes zibellina</i> L) of the Central Siberian plateau and adjacent territories <i>S. N. Kashtanov, Yu. A. Stolpovsky, I. G. Meshchersky, E. A. Nikolaeva, V. V. Rozhnov, and G. R. Svishcheva</i>	41
Molecular phylogeny suggests crucial role of developmental timing as the source of orchid inflorescences diversity <i>V. Kharchenko, M. Telepova-Texier, D. Larpin, and D. Sherbakov</i>	42
Comparison of viral, bacterial, and fungal metagenome of black garden ants <i>Lasius niger</i> from urban and rural populations <i>E. A. Konorov, M. B. Adaeu, and V. A. Scobeyeva</i>	44
Stress-tolerant microbial consortia containing the carotenogenic green microalga <i>Haematococcus lacustris</i> and cyanobacteria in the supralittoral zone of the White Sea <i>A. Kublanovskaya, K. Chekanov, and E. Lobakova</i>	45
Worldwide molecular-phylogenetic revision of the genus <i>Hypnum</i> (Hypnales, Bryophyta) <i>J. Kučera and M. S. Ignatov</i>	46
Distribution of <i>GH1</i> , <i>GHR</i> , and <i>PRL</i> gene polymorphisms in two Turano Mongolian cattle breeds from Russia, China, and Mongolia <i>I. V. Lazebnaya, O. E. Lazebny, and Yu. A. Stolpovsky</i>	47
How many species of birds live on the Earth? <i>D. Yu. Leoke and A. V. Trukhina</i>	48
Oncogenes, a tumor suppressor, and differentiation genes represent the oldest human gene classes and evolve concurrently <i>A. Makashov, S. Malov, and A. Kozlov</i>	49
Genes of red and green origin in diatom genomes <i>A. A. Morozov and Y. P. Galachyants</i>	51
Phylogeny of <i>Ophiorrhiza</i> L. (<i>Rubiaceae</i>) species from South-East Asia revealed by molecular data <i>A. A. Nabatov and I. A. Schanzer</i>	52
Total-evidence phylogeny of the tropical tribe Rhinomirini: How morphology and DNA work together to achieve better resolution and coverage <i>A. A. Namyatova</i>	53

Codons not for proteins: Amino acids and codons biases in promoters and transcription factors binding sites serve their electrostatics <i>A. A. Osypov, E. A. Krutinina, G. G. Krutinin, and S. G. Kamzolova</i>	54
Complex evolution of tRNA genes in mitochondrial genomes of Baikalian amphipods <i>E. V. Romanova, Y. S. Bukin, K. V. Mikhailov, M. D. Logacheva, V. V. Aleoshin, and D. Yu. Sherbakov</i>	56
Can restriction site avoidance in a viral genome be used for prediction of phage hosts? <i>I. Rusinov, A. Ershova, M. Khachatryan, A. Karyagina, S. Spirin, and A. Alexeevski</i>	58
The long noncoding region of mitochondrial DNA as a population and phylogenetic marker of bird schistosome <i>Trichobilharzia</i> spp. (Trematoda: Schistosomatidae) <i>S. K. Semiyenova and G. G. Chrisanfova</i>	60
Fungi-bacterial association of contaminated jet fuel TS-1 <i>T. N. Shapiro, G. A. Dolnikova, D. A. Sandzhieva, A. A. Parkhomenko, and E. S. Lobakova</i>	61
Why are aquatic mosses often sister to epiphytes? <i>J. R. Shevock, O. I. Kuznetsova, and M. S. Ignatov</i>	62
The diversity of clinical <i>Pseudomonas aeruginosa</i> strains <i>O. L. Voronina, E. I. Aksenova, N. E. Sharapova, M. S. Kunda, A. N. Semenov, N. N. Ryzhova, and N. A. Zigangirova</i>	63
Interaction of miRNA with mRNA of orthologous genes involved in the development of neurodegenerative and oncological diseases <i>O. Yurikova, S. Atambayeva, R. Niyazova, and A. Ivashchenko</i> ...	64
Phylogenomics with BUSCO <i>E. M. Zdobnov</i>	65
Identification of hybrids between <i>Tribolodon hakonensis</i> and <i>Tribolodon brandtii</i> using morphological traits and four molecular genetic markers <i>A. O. Zolotova</i>	66
Part III POSTER CONTRIBUTIONS	67
Characterization of bacterial communities in the soil of oasis Larsemann Hills, Eastern Antarctica <i>M. R. Chekin and A. G. Kudinova</i>	69
Structural rearrangements at the regulatory region of the <i>Dras1</i> gene in the evolutionary history of phylogenetically distant <i>Drosophila</i> species <i>A. I. Chekunova, S. Yu. Sorokina, E. A. Sivoplyas, G. N. Bakhtoyarov, M. I. Barsukov, and A. M. Kulikov</i>	70

Nuclear ribosomal transcribed spacer polymorphism in <i>Paeonia</i> (Paeoniaceae) as evidence of recent divergence in the genus <i>G. V. Degtjareva, S. V. Efimov, E. I. Terenteva, T. H. Samigullin, and C. M. Vallejo-Roman</i>	71
Inspecting COGs with COGcollator as a method to avoid pitfalls in phylogenomic analysis <i>D. V. Dibrova, K. A. Konovalov, V. V. Perekhvatov, K. V. Skulachev, and A. Y. Mulkidjanian</i>	73
Molecular phylogeny and classification of <i>Yersinia pestis</i> strains from Eastern Europe and Central Asia <i>G. A. Eroshenko, Z. V. Al'khova, and L. M. Kukleva</i>	74
On the creation of the sturgeon fish biobank <i>I. V. Kornienko, T. G. Faleeva, and G. G. Matishov</i>	75
Prospects of genetic passport system in the Russian Federation <i>I. V. Kornienko, T. G. Faleeva, V. S. Rakuts, I. N. Ivanov, and U. S. Sidorenko</i>	77
On the evolution of the north lineage of the genus <i>Lotus</i> s.l. (Leguminosae), relationships between <i>Lotus</i> and <i>Dorycnium</i> , and the closest relatives of the <i>Lotus corniculatus</i> complex <i>T. E. Kramina, G. V. Degtjareva, T. H. Samigullin, M. V. Kuturova, and D. D. Sokoloff</i>	79
New strains of hydrocarbon oxidizing bacteria from Lake Beloe <i>T. R. Kravzova, I. V. Lazebnaya, R. A. Sidorov, O. E. Lazebny, V. V. Ilinsky, K. A. Chekanov, T. I. Komarova, A. Yu. Akulova, I. V. Mosharova, and O. A. Koksharova</i>	81
Molecular phylogeny and physiological features of a new nanodiamond resistant bacterium <i>T. R. Kravzova, N. A. Safronova, R. A. Sidorov, and O. A. Koksharova</i>	83
Phylogenetic analysis of cyanobacterial glutamate-like receptors: The first overlook <i>O. E. Lazebny, I. V. Lazebnaya, and O. A. Koksharova</i>	85
Molecular phylogeny of <i>Rhododendron brachycarpum</i> D. Don ex G. Don fil. on the Kunashir island <i>E. V. Linnik, T. Fukuda, and E. I. Terenteva</i>	86
Genetic diversity of limpets of the genus <i>Lottia</i> Gray, 1833 from the Far Eastern seas of Russia <i>V. V. Malyar, S. N. Sharina, and A. V. Chernyshev</i>	89
DNA modeling as Markov switching model with mixing emissions <i>M. Malyutov</i>	90

DNA barcoding of Eastern Siberian flat leeches (Hirudinea: Glossiphoniidae) <i>N. B. Mandzyak, I. A. Kaygorodova, and A. V. Bolbat</i>	93
Is phylogeny blind without morphology? The case of <i>Paramecium</i> <i>M. Melekhin, L. Nikitashina, N. Lebedeva, G. Petroni,</i> <i>O. Lanzoni, I. Nekrasova, S. I. Fokin, and A. Potekhin</i>	94
The evaluation of different types of genomic reorganization according to whole genome analysis of several closely related strains of cyanobacterium <i>Trichormus variabilis</i> <i>P. V. Meshcheryakova, E. A. Karbysheva, L. E. Mikheeva,</i> <i>A. A. Penin, and O. F. Zhenavchuk</i>	95
A new Pedinophyceae species discovered in picoplanktonic eDNA from the White Sea <i>I. A. Milyutina, T. A. Belevich, L. V. Ilyash, and A. V. Troitsky</i>	96
Using historical DNA to understand evolutionary and ecological processes in fishes <i>A. V. Nedoluzhko, S. M. Rastorguev, F. S. Sharko, N. S. Muge,</i> <i>E. P. Simonov, and B. A. Levin</i>	99
Genetic analysis of the charrs <i>Salvelinus</i> across its Northeast Asian range: Evidence for a contact zone in Kamchatka <i>A. G. Oleinik, L. A. Skurikhina, and A. D. Kukhlevsky</i>	100
Epigenetics and DNA electrostatic and other physical properties <i>A. A. Osypov, I. Yu. Popova, and N. Y. Oparina</i>	101
Redescription of <i>Pharyngocirrus uchidai</i> (Annelida: Saccocirridae) using scanning electron microscope and molecular data <i>J. Park and J. Jung</i>	103
Molecular COI taxonomy of freshwater mussels of genus <i>Unio</i> from Volga basin <i>N. B. Petrov and I. P. Vladychenskaya</i>	104
Modeling the patterns of genetic diversity in complicated microevolutionary scenarios <i>A. A. Poroshina and D. Yu. Sherbakov</i>	105
Characterization of the complete chloroplast genome of <i>Paeonia</i> <i>lactiflora</i> Pall. (Paeoniaceae: Saxifragales) <i>T. H. Samigullin, M. D. Logacheva, G. V. Degtjareva,</i> <i>S. V. Efimov, and C. M. Vallejo-Roman</i>	106
Taxonomical status of the Limpets of genus <i>Erginus</i> (Patellogastropoda) <i>S. N. Sharina, A. V. Chernyshev, and N. I. Zaslavskaya</i>	110

Sequencing of the polyploid transcriptomes of freshwater and migratory forms of Far East salmon <i>Oncorhynchus nerka</i> <i>E. A. Shubina, G. N. Markevich, M. D. Logacheva, A. A. Penin, D. V. Goryunov, and A. M. Khrustaleva</i>	111
Out of Africa — molecular structure and biogeography of intertidal barnacles <i>N. Simon-Blecher, O. Bronstein, F. Maltagliati, F. G. Pannacciulli, B. Kugoro, and Y. Achituv</i>	113
Tandem duplication random loss events influenced to gene order changes in Baikalian amphipods <i>E. A. Sirotinina, E. V. Romanova, and D. Yu. Sherbakov</i>	114
Phylogeography of the Pacific smelt, <i>Osmerus dentex</i> : One or multiple glacial refugia? <i>L. A. Skurikhina, A. G. Oleinik, A. D. Kukhlevsky and N. E. Kovpak</i>	115
Evolution of nematode defecation motor program <i>G. A. Slivko-Koltchik, V. P. Kuznetsov, D. A. Voronov, and Y. V. Panchin</i>	116
Comparative transcriptome analysis of the terrestrial snail <i>Arianta arbustorum</i> from aboriginal and dispersing populations <i>O. V. Tarasov, O. V. Bondareva, and N. I. Abramson</i>	119
The effect of domestication on reproductive characteristics in birds <i>A. V. Trukhina and D. Yu. Leoke</i>	120
Assessment of species specificity of the mitochondrial genome of Russet Sousek <i>Spermophilus major</i> Pallas, 1778 <i>A. R. Tukhbatullin, S. Yu. Kapustina, O. A. Ermakov, S. V. Titov, and O. V. Brandler</i>	121
The diversity of fungi as an important component of cystic fibrosis lung microbiome <i>O. L. Voronina, N. N. Ryzhova, I. A. Prudnikova, M. S. Kunda, E. I. Aksenova, N. E. Sharapova, E. L. Amelina, O. I. Simonova, A. G. Chucalin, and A. L. Gintsburg</i>	123
