

CONTENTS

| | |
|--|-----------|
| Notations | 9 |
| Foreword | 12 |
| Chapter 1. Phase and Chemophase Transformations | 14 |
| 1.1 Thermodynamics of Equilibrium and Explosion-Like Transformations | 14 |
| 1.1.1 Conditions for stability and absolute instability of a phase state..... | 14 |
| 1.1.2 Condition of stability and stability failure for polymer systems..... | 19 |
| 1.1.3 Condition for failure of structural stability of crystalline inorganic compounds | 23 |
| 1.1.4 Condition for explosion-like decomposition of crystals | 24 |
| 1.2 Kinetic Characteristics of Evaporation | 28 |
| 1.3 Bubble-Boiling and Explosion-Like Nucleation Regimes of Liquid Boiling | 30 |
| 1.4 Boiling Kinetics in Superheated Condensed System | 32 |
| 1.5 Effect of Mechanical Activation on Boiling and Sublimation | 34 |
| 1.6 Attainable Superheating Notion..... | 35 |
| 1.7 Melting and Boiling with Decomposition. Dissociative Sublimation | 38 |
| 1.8 Kinetics of Chemophase Transformations | 40 |
| 1.8.1 Low-temperature processes | 40 |
| 1.8.2 High-temperature processes | 41 |
| 1.9 Attainable Superheating of Energetic Materials | 42 |
| 1.10 Spinodal and Small Superheating Equations | 46 |
| 1.10.1 Thermally stable condensed system | 46 |

| | |
|--|------------|
| 1.10.2 Thermally unstable condensed system | 47 |
| 1.11 Correlation Between the Burning Law and Evaporation Process | 48 |
| 1.12 Boiling with Decomposition and Dissociative Sublimation on the Burning Surface..... | 49 |
| Chapter 2. Techniques and Results of Experimental Studies | 52 |
| 2.1 Monitoring of a Thermal Combustion Wave | 52 |
| 2.2 Special Thermal Analysis Techniques | 57 |
| 2.2.1 “Thermal probe” technique | 57 |
| 2.2.2 “Sandwich” technique | 61 |
| 2.2.3 “Imprint” technique..... | 62 |
| 2.2.4 Filament technique..... | 69 |
| 2.2.5 Experimental results | 69 |
| 2.3 Microkinetics of Thermal Destruction of Polymers | 76 |
| 2.3.1 Polyurethane foam | 76 |
| 2.3.2 Butadiene rubber..... | 81 |
| 2.3.3 Error of measurements..... | 82 |
| 2.4 Linear Pyrolysis Technique | 84 |
| 2.5 Effect of Heating Rate on the Temperature Range of Thermal Condensed System Decomposition | 87 |
| 2.6 Condition for Localizing Phase and Chemophase Transformation on the Burning Surface | 89 |
| 2.7 Two Regimes of Evaporation and Thermal Decomposition | 93 |
| 2.7.1 Evaporation regime | 93 |
| 2.7.2 Chemophase transformation regime | 95 |
| 2.8 Analytical Description of Experimental Data | 96 |
| 2.8.1 Kinetics of evaporation | 96 |
| 2.8.2 Kinetics of thermal decomposition with evaporation | 97 |
| 2.9 Heats of Thermal Decomposition Reactions..... | 99 |
| 2.10 Temperature Dependence of Chemophase Transformation Parameters | 102 |
| Chapter 3. Mathematical Modeling of Burning Regimes | 104 |
| 3.1 Thermal Decomposition of Volatile Energetic Materials ... | 104 |
| 3.1.1 Volumetric evaporation effect | 104 |
| 3.1.2 Kinetics of bubble thermolysis of volatile explosives | 105 |

| | | |
|---|--|------------|
| 3.1.3 | Heat-release kinetics | 106 |
| 3.1.4 | “Mild” and “violent” thermal explosion of volatile systems..... | 108 |
| 3.2 | Heat- and Mass-Transfer Equations..... | 109 |
| 3.3 | Michelson Temperature Profile | 110 |
| 3.4 | Slow Burning Regime | 112 |
| 3.4.1 | Thermal balance equation | 112 |
| 3.4.2 | Kinetic equation..... | 113 |
| 3.4.3 | Propagation of a mass reduction front at the bubble boiling with thermolysis | 115 |
| 3.4.4 | Temperature dependence of thermolysis rate | 116 |
| 3.5 | Solution of the Set of Equations..... | 117 |
| 3.5.1 | Determination of parameters | 117 |
| 3.5.2 | Conditions of combustion stability..... | 120 |
| 3.6 | Propagation of a Thermal Superheating Wave..... | 121 |
| 3.6.1 | Thermal balance equation | 121 |
| 3.6.2 | Kinetic equation..... | 122 |
| 3.7 | Verification of the Calculation Relationships | 123 |
| 3.8 | Flash Regimes | 124 |
| 3.9 | Combustion Front Propagation from an Ignition Spot | 126 |
| 3.10 | Flash with a Bang | 128 |
| Chapter 4. Self-Propagating High-Temperature Synthesis | | 131 |
| 4.1 | Basic Notions | 131 |
| 4.2 | Thermal (Temperature) Wave Velocity | 132 |
| 4.3 | Condition of Burning Stability | 136 |
| Chapter 5. Unsteady Combustion Regimes | | 138 |
| 5.1 | Basic Information..... | 138 |
| 5.2 | Ignition Regimes..... | 138 |
| 5.2.1 | Ignition by a hot surface..... | 138 |
| 5.2.2 | Ignition by a heat flux | 141 |
| 5.3 | Combustion Instability Caused by a Pressure Drop | 141 |
| 5.4 | Sensitivity of Energetic Materials to Mechanical Impacts .. | 142 |
| 5.5 | Kinetics of Mechanical Activation Processes | 146 |
| 5.6 | Mechanics of Impact Loading..... | 150 |
| 5.7 | Condition for a Flash Resulting from Mechanical Activation | 153 |
| 5.8 | Burning of Energetic Materials with Increasing Rate..... | 158 |

| | |
|--|------------|
| Chapter 6. High-Speed Explosion Combustion Regime (Subdetonation) | 159 |
| 6.1 Mathematical Model | 159 |
| 6.2 Experimental Data | 162 |
| 6.3 Numerical Solution of the Heat Conduction Equation..... | 166 |
| 6.4 Origination of Temperature-Mechanical Stresses..... | 172 |
| 6.5 An Analytical Solution of Heat Conduction Equation..... | 173 |
| 6.6 Onset of Detonation in Energetic Materials | 176 |
| 6.7 Excitation of a High-Velocity Burning Regime..... | 178 |
| 6.8 Shock Wave Initiation of Explosion | 179 |
| 6.9 Concluding Remarks | 180 |
| Chapter 7. Combustion of Composite Propellants | 181 |
| 7.1 Schematization of the Structure | 181 |
| 7.2 Basic Relations | 184 |
| 7.3 Conditions at the Interface | 184 |
| 7.4 Model of Heat Exchange in Condensed System with Allowance for Thermal Radiation of the Gas Volume | 186 |
| 7.5 Results of Numerical Simulation | 187 |
| 7.6 Factors Intensifying Combustion | 188 |
| 7.7 Grounding of the Thin Reaction Layer Assumption | 190 |
| 7.8 Temperature Sensitivity of Burning Rate of Energetic Materials | 192 |
| 7.9 Determination of Coefficient f | 195 |
| 7.10 Combustion and Explosion of Composite High Explosives | 197 |
| Concluding Remarks | 199 |
| Appendix A | 203 |
| A1 Mechanical Activation of Nucleation..... | 203 |
| A2 Estimation of Temperature Measurements in Contact Thermal Analysis Methods | 207 |
| A3 Critical Charge Diameter at a High-Speed Combustion Regime | 209 |
| A4 Studies of Combustion During a Discharge..... | 210 |
| References | 211 |
