

Contents

Defense Research and Explosive Processing of Materials <i>E. P. Carton</i>	1
Concentric Explosion Welded Products <i>J. Banker</i>	2
Role of Gas in the Gap During Explosive Cladding <i>I. M. Richardson, E. P. Carton, Y. van der Drift, and H. van der Linde</i>	3
Comparative Tensile Strength and Shear Strength of Detacled Explosion Clad Products <i>C. Prothe</i>	4
(Hot) Explosive Cladding of Tungsten on Copper and Stainless Steel Substrates <i>E. P. Carton, M. Stuivinga, F. Schmalz, and J. G. van der Laan</i>	5
Some Aspects of Join Formation During Explosive Welding <i>O. L. Pervukhina, D. V. Rikhter, I. V. Denisov, and L. B. Pervukhin</i>	7
Tungsten Carbide–Aluminum Multilayer Composites by Underwater Explosive Welding <i>S. Tanaka, K. Hokamoto, and S. Itoh</i>	8
Explosive Welding: Deformation–Time Relationship <i>S. V. Kuz'min, V. I. Lysak, and V. A. Chuvichilov</i>	9
Cumulative Metal Losses During Explosive Welding of Model Al-Based Composites <i>E. A. Chugunov, S. V. Kuz'min, V. I. Lysak, and A. P. Peev</i>	10
Optimization of Blast Characteristics for Explosive Production of Large-Size Clad Plates <i>V. S. Vakin</i>	11

New Technique for Explosive Welding of High-Strength Aluminum Alloys <i>S. Yu. Illarionov, L. D. Dobrushin, and Yu. I. Fadeenko</i>	13
Detonation Synthesis of Spherical Ultrafine Nanostructured Al_2O_3 <i>R. Mendes, J. Ribeiro, J. Campos, and I. Plaksin</i>	14
Explosive Welding of Some Thin Materials onto Magnesium Alloy Using Underwater Shock Wave <i>A. Mori, K. Hokamoto, and M. Fujita</i>	15
Explosive Welding of Corrosion-Resistant Materials with Single- or Double-Sided Cladding <i>A. F. Ilyuschenko, A. A. Komorniy, V. A. Konoplyanik, I. V. Petrov, G. V. Smirnov, and A. D. Shuganov</i>	16
Testing Ti-Steel Clad Metals by Thermal Loading <i>R. Bański, M. Sozańska, Z. Szulc, and A. Gałka</i>	18
Speckle Interferometry As a Tool for Testing Clad Metals <i>A. E. Rozen, V. A. Solov'ev, D. B. Kryukov, I. S. Los', and A. V. Khorin</i>	19
Explosive Welding of Multilayer Packages: Duration of Initial Acceleration <i>S. V. Kuz'min, V. I. Lysak, and E. S. Arestov</i>	20
Numerical Studies on Explosive Welding by Smoothed Particle Hydrodynamics <i>K. Tanaka</i>	21
Effect of Material Microstructure on Wave Formation Under Explosive Loading <i>S. K. Godunov, S. P. Kiselev, V. P. Kiselev, and V. I. Mali</i>	22
Modeling Explosive Welding by Using LS-Dyna Software <i>A. E. Rozen, I. S. Los', A. Yu. Muizemnek, D. B. Kryukov, and E. G. Troshkina</i>	24
A Condition for Wave Formation During Explosive Welding <i>V. G. Petushkov and L. D. Dobrushin</i>	25

Explosive Welding of Ni- and Fe-Based Amorphous Foils for Microtooling Applications <i>R. Minev, S. Koev, and N. Festchiev</i>	27
Natural Strains near Weld Interface for Different Collision Angles <i>H. H. Yan, X. J. Li, Y. X. Ou, X. H. Wang, G. L. Sun, Y. D. Qu, and X. Y. Qin</i>	28
Explosive Production of Ultrafine-Grained Materials <i>Yu. A. Gordopolov, S. S. Batsanov, V. A. Veretennikov, N. G. Zaripov, and L. V. Gordopolova</i>	29
Hot Explosive Pressing of High-Strength and Superhard Materials <i>R. Prümmer and K. Hokamoto</i>	31
Dynamic Treatment of Particles, from Macro- to Nanoscale <i>A. G. Mamalis</i>	32
Applicability of Analytical Models to Predicting the Hugoniot of Prepressed Low-Density Compacts of Iron Nanoparticles <i>C. Dai, D. E. Eakins, and N. N. Thadhani</i>	33
Explosive Loading of Powdered Materials: Basic Research and Applications <i>A. A. Shtertser</i>	35
Can Carbon Be Incorporated into Spinel-Type Si_3N_4 ? <i>T. Sekine</i>	37
Compaction and Synthesis of MgB_2 Superconductors by Explosive Techniques <i>A. G. Mamalis, E. Hristoforou, D. E. Manolakos, and I. D. Theodorakopoulos</i>	38
Explosion-Assisted Synthesis of Magnesium Diboride <i>V. I. Mali, O. I. Lomovskii, and G. V. Golubkova</i>	40
Detonation Synthesis and Consolidation of Nanodiamond <i>A. A. Komorniy, A. P. Korzhenevski, I. V. Petrov, and G. V. Smirnov</i>	42

Hot Explosive Consolidation of Tungsten–Metallic Glass Matrix Composites <i>A. B. Peikrishvili, L. J. Kecskes, and N. M. Chikhradze</i>	44
Hot Shock Wave Consolidation of WC–NiAl Composites: A Structure/Property Relationship Investigation <i>A. B. Peikrishvili, L. J. Kecskes, M. V. Tsiklauri, E. Sh. Chagelishvili, and B. A. Godibadze</i>	45
Nanostructured Polymeric Materials Strengthened with Carbon Nanoparticles Synthesized by Detonation <i>S. Y. Stavrev and N. V. Dishovski</i>	46
Recycling Al-Rich Byproducts of Aluminum Surface Treatment Industries: Shock-Enhanced Sinterability of Wastes <i>J. B. Ribeiro, A. R. Farinha, R. A. Mendes, and M. T. Vieira</i>	47
Hydrogen Corrosion of Explobond in Clad Steels <i>K. Lublińska, A. Szummer, K. Szpila, M. Gloc, and K. J. K. Kurzydłowski</i>	48
Improvement of Join Quality by Using Underwater Explosive Welding <i>K. Hokamoto</i>	49
Influence of Initial Density on the Structure of Detonation Waves in Pressed High Explosives <i>A. V. Utkin</i>	50
Deformation Control in Explosive Forming <i>H. D. Groeneveld</i>	51
New Mix Explosives for Explosive Welding <i>L. Andreevskikh, A. Deribas, O. Drennov, A. Mikhailov, N. Titova, and L. Fomicheva</i>	52
Influence of Various Factors on Detonation of Composite Explosives Based on Ammonium Nitrate <i>Yu. M. Mikhailov, L. V. Ganina, E. A. Ivanova, V. V. Lavrov, and A. V. Utkin</i>	53

Internal Explosive Loading of Closed Vessels <i>L. B. Pervukhin, P. A. Nikolaenko, A. G. Kazantsev, A. D. Chudnovskii, and N. G. Merinov</i>	54
Corrosion-Resistant Explocad Metals: Properties and Production Experience <i>L. B. Pervukhin, A. D. Chudnovskii, O. L. Pervukhina, D. V. Rikhter, and V. V. Zaitsev</i>	55
Behavior of Hemispherical Explosive Chamber in Conditions of Shock Loading <i>X. J. Li, X. Y. Qin, Y. Wang, and H. H. Yan</i>	57
Effect of Mechanical Activation on Thermal Explosion in the Ti–Ni System <i>O. A. Shkoda and N. G. Kasatskii</i>	59
Effect of Underwater Shock Wave on Jute Fiber and Its Characteristics <i>G. M. Sh. Rahman and S. Itoh</i>	60
Processing ZnS-Based Electroluminescent Precursor Powder Mixtures with TNT <i>G. B. Kennedy and S. Itoh</i>	61
Explosion Stress Relieving in Welded Joints of Metal Structures <i>L. D. Dobrushin, V. G. Petushkov, A. G. Bryzgalin, J. G. Moon, and Yu. I. Fadeenko</i>	62
Characterization of Products Formed in the Zn–S System upon Combustion or Detonation <i>Yu. A. Gordoplov, O. L. Pervukhina, and V. S. Trofimov</i>	63
Synthesis of Multilayer Composites and Optimization of Their Strength Properties <i>S. A. Zelepugin, O. A. Shkoda, N. G. Kasatskii, and S. S. Shpakov</i>	65
Strength of Aluminum–Steel Transition Joints with Rippled Interface: Effect of Thermal Cycling <i>A. Z. Bogunov, A. A. Kuzovnikov, S. I. Fomin, and D. V. Kiselev</i>	67

Influence of Internal Rarefaction Waves on Explosive Welding <i>S. N. Buravova, Yu. A. Gordopolov, I. V. Denisov, and O. L. Pervukhina</i>	69
Biosealing of a Mars-Sample Container Using Explosive Welding <i>E. P. Carton, C. M. Wentzel, M. De Ridder, and J. Krause</i>	70
Fatigue Resistance of Explosion Clad Metals: Probabilistic Aspects <i>A. D. Chudnovskii and L. B. Pervukhin</i>	71
Three-Layer Composite Materials by Battery-Type Explosive Welding <i>V. A. Chuvichilov, S. V. Kuz'min, and V. I. Lysak</i>	72
Fusion of Diamond in Shock Waves <i>V. V. Danilenko</i>	73
Explosive Welding of Large-Sized Sheets: Tensile Deformation of Base Sheet <i>I. V. Denisov, O. L. Pervukhina, and L. B. Pervukhin</i>	76
Mixture of Porous Ammonium Nitrate with Diesel Oil for Use in Industrial-Scale Explosive Welding <i>N. A. Denisova, O. L. Pervukhina, L. B. Pervukhin, G. S. Doronin, V. V. Alekseev, and G. Kh. Kim</i>	77
High-Energy Processing of Materials: Technologies of the 21st Century <i>R. P. Didyk</i>	79
Pressure and Deformations Formed in Metal Loaded with Explosion of Cord Explosive Charge <i>L. D. Dobrushin, V. G. Petushkov, and A. G. Bryzgalin</i>	80
Shear Instability at the Explosion Product – Metal Interface for Sliding Detonation of Explosive Charge <i>O. B. Drennov, A. I. Davydov, A. L. Mikhailov, and V. A. Raevskii</i>	81
Instability of Interface Between Steel Layers Caused by Oblique Shock Wave <i>O. B. Drennov, A. L. Mikhailov, P. N. Nizovtsev, and V. A. Raevskii</i>	82

Production of Clad Metals at Baoti Group Ltd. <i>Y. He and R. Liu</i>	84
Fabrication of Nanocomposite Permanent Magnets by Shock Compaction of Powders <i>Z. Jin, C. Dai, and N. N. Thadhani</i>	85
Explosive Welding: Temperature Profile of Heat-Affected Zone <i>S. V. Khaustov, S. V. Kuz'min, and V. I. Lysak</i>	87
Technological Capabilities of BOM Ltd. in Explosive Forming and Joining of Metals <i>S. Koev and R. Minev</i>	88
Impact of High-Speed Particles with a Metallic Obstacle <i>A. L. Krivchenko, E. V. Petrov, and R. G. Kirsanov</i>	90
Explosive Welding of Steel–Aluminum Composites with an Antidiffusion Chromium Layer <i>V. I. Kuz'min, V. I. Lysak, O. V. Stokov, and V. V. Litvinov</i>	91
Dynamic Compaction of Iron Disilicide Powders <i>V. N. Lashkov, A. A. Selezenev, A. V. Strikanov, A. A. Tikhonova, and V. I. Rybakov</i>	92
Preparation of Nanostructured TiO ₂ Particles by Gas-Phase Detonation <i>X. J. Li, Y. X. Ou, H. H. Yan, Z. Zhao, and Y. D. Qu</i>	93
Characterization of a Titanium–Steel Explosion Bond Interface <i>A. Nobili</i>	94
Effects of Heat Treatment Temperature and Time on the Properties of Titanium/Steel and Zirconium/Steel Clad <i>S. Pauley and C. Toth</i>	95
Explosive Welding of Dissimilar Metals: Temperature–Deformation Relationship <i>A. P. Peev, S. V. Kuz'min, V. I. Lysak, and S. V. Khaustov</i>	96

Hot Explosive Jacketing and Strengthening of Tungsten Heavy and Hard Alloy Rods <i>A. B. Peikrishvili, L. J. Kecskes, E. Sh. Chagelishvili, and N. M. Chikhradze</i>	97
Structure and Properties of Hot Shock Wave Consolidated Cu–W Composites <i>A. B. Peikrishvili, L. J. Kecskes, E. Sh. Chagelishvili, B. R. Klotz, G. I. Mamniashvili, and B. A. Godibadze</i>	98
Instrumentation for Strain Measurements in Explosion-Loaded Closed Vessels <i>L. B. Pervukhin, P. A. Nikolaenko, A. V. Poletaev, A. G. Kazantsev, and A. D. Chudnovskii</i>	99
Method of Traps for Analysis of Particles Flying Out from Technological Gap <i>O. L. Pervukhina, A. A. Berdychenko, and L. B. Pervukhin</i>	101
New Model of Elastic Media: Numerical Studies <i>I. M. Peshkov</i>	103
Effect of Initial Temperature Attained at Contact Point on Explosive Welding <i>D. V. Rikhter, L. B. Pervukhin, and O. L. Pervukhina</i>	104
Multilayer Clad Metals by Explosive Welding <i>A. E. Rozen, I. S. Los', D. B. Kryukov, I. V. Denisov, A. V. Khorin, L. B. Pervukhin, and O. L. Pervukhina</i>	105
Explosive Deposition of Powders onto Magnetron Targets <i>A. E. Rozen, S. G. Usatyi, and D. V. Karakozov</i>	106
Sintering of Shock-Processed Powders <i>A. E. Rozen, S. G. Usatyi, A. V. Pryshchak, and D. V. Karakozov</i>	107
Fabrication of Cermet Composites by Explosive Welding Combined with Thermochemical Synthesis <i>I. V. Saikov, L. B. Pervukhin, O. L. Pervukhina, A. S. Rogachev, and H. E. Grigoryan</i>	108

Shock-Assisted Compaction of AlN-Based Ceramics <i>I. V. Saikov, O. L. Pervukhina, and L. B. Pervukhin</i>	109
Dynamic Compaction of Fine Iron Disilicide Powders: Numerical Simulation <i>A. A. Selezenev, V. N. Lashkov, A. Yu. Aleinikov, O. G. Sin'kova, and Yu. V. Yanilkin</i>	110
Dynamic Viscosity of Metals: Experimental Determination and Mathematical Model <i>S. V. Serikov, I. K. Ustinov, and L. B. Pervukhin</i>	111
Explosive Technologies for Production of Plane Bearings <i>A. A. Shtertser, V. Yu. Ul'yanitsky, S. B. Zlobin, B. S. Zlobin, A. I. Popelukh, and V. A. Bataev</i>	112
Cylindrical Camera for Explosion-Driven Synthesis of New Materials <i>A. V. Shurupov, A. A. Deribas, and N. P. Shurupova</i>	114
Explosive Welding: Vertical Motion of Welded Sheets Ahead of Detonation Front <i>T. Sh. Sil'chenko, S. V. Kuz'min, V. I. Lysak, and Yu. G. Dolgii</i>	115
Emulsion Explosive for Explosive Welding <i>V. V. Sil'vestrov, A. V. Plastinin, and S. M. Karakhanov</i>	116
Formation of Plasma Spots During Superdeep Penetration of Microparticles into Solids <i>V. V. Sobolev and S. M. Usherenko</i>	117
Systems for Shock-Assisted and Detonation-Driven Synthesis: Reactivity of Ti-C Powder Mixtures <i>V. A. Veretennikov</i>	118
Author Index	120
Technical Program of the 9th International Symposium on Explosive Production of New Materials: Science, Technology, Business, and Innovations (EPNM-2008), May 6–9, 2008, Lisse, the Netherlands	I
